Technical Newsletter***

November/December 1991

Amiga Mail

Volume II

Amiga Mail is published six times annually by the Commodore Applications and Technical Support Group (CATS). Its purpose is to support third-party developers of Amiga software and hardware worldwide by providing technical information and programming guidelines. Each issue features a collection of news and technical articles of special interest to Amiga product developers.

The Amiga Mail Reference Book (Volume II)

Collectively, the articles from this issue and past issues of Amiga Mail form a reference book. The book is broken up into chapters covering different aspects of Amiga programming (Exec, IFF, AmigaDOS...). All Amiga Mail issues are printed on three hole punch paper so they can easily be filed in a three ring reference book binder. To file the articles from this issue in the reference book, use the chapter and page numbers that appear at the foot of each page. Each page's chapter number is shown as a Roman numeral followed by its page number within that chapter.

For instance, the Amiga Mail article below "Notification", would be filed in chapter II of the binder, which is the "AmigaDOS" chapter. The article starts on page 31 of that chapter in the binder.

Each issue of Amiga Mail also comes with an update to the book's table of contents.

From time to time, an issue of Amiga Mail is published with correction pages which replace existing pages in the Amiga Mail reference book. These appear at the end of an Amiga Mail issue after the Table of Contents update.

For more information on how to obtain a binder, chapter separators, and past issues of Amiga Mail, contact your local Commodore support manager, or, if you are in the U.S., contact CATS at (215) 431-9180.
