Chapter 1

PathEditor

1.1 AmigaGuide Path Editor

This tool is used to edit the path that AmigaGuide uses to locate its
databases.

1.2 Add a Path Entry

Add the current contents of the text entry gadget to the path list.

1.3 Delete a Path Entry

Delete the currently selected path from the list.

1.4 Clear the Path List

Remove all the entries from the path list.

1.5 List of Path Entries

This displays the path.

1.6 Save the Path

This will cause the PathEditor to save the path to the Path
environment variable ENVARC:AmigaGuide/Path and ENV:AmigaGuide/Path.

1.7 Use the Path

This will cause the PathEditor to save the path to the Path
environment variable ENV:AmigaGuide/Path.

1.8 Cancel Path Editor

Leave the PathEditor without saving any changes.

1.9 Quit

Leave the PathEditor without saving any changes.

1.10 Command Shell

Open the command shell.

1.11 Snapshot Window

Snapshot the current window position.
