1.2 version

Short: AmigaGuide to *ALL* Amiga CDROMs! v1.2
Author: Anders.Bakkevold@norway.bbs.no (Anders Bakkevold)
Uploader: Anders.Bakkevold@norway.bbs.no (Anders Bakkevold)
Type: docs/hyper

This is version 1.2 of the "Amiga CDROM Guide".
It was last updated on September 3rd 1995.

ACDG is a huge database which gives information on almost every CDROM that works with the Amiga range of computers. It doesn't include the commercial CD32/CDTV games.

It is in the easy-to-use Amigaguide format, and information can easily be accessed through many nodes with different sorting methods. For example: Click on "Raytracing" and get a list of CDROMs that would be of interest to Raytrace enthusiasts.

You can also read reviews from CU-Amiga etc on a CDROM, if available. Amiga CDROM Guide is freeware.

This version contains 157 Amiga CDROMs:

Essential Utilities

Note: Not all CDROMs are included, only those I have a review etc of.
It's difficult to get an "Excellent" rating, and also very hard
to get a "Bad" rating.

1.5 How to contribute.

If you have any suggestions or have found any bugs, then contact me immediately.

If you have more information on covered CDs, or about new CDs then contact me too. You will be credited in the guide.

I'm especially seeking for people who have bought/tested a CD, and who could write descriptive "contents" and "testers opinion".
If you have a different opinion than the tester in "testers opinion", then feel free to write to me and tell me what you think.

And of course if you have any information which could fill the gap:
"Information not available." - then don't just sit there!

1.6 distribution

Legal stuff:

Even though I try to check that the information given in this guide is correct, I cannot in any way guarantee it.

1.9 Future

What to do with Amiga CDROM Guide :

- Start a mailing-list (?)

If there is demand, and no technical problems, I can start a mailinglist. When you subscribe to it (free, of course), you will receive up to date information about new CDROMs and other info that is of interest to CDROM owners. Instead of waiting for the next version of the guide to arrive, you will get the info when it's HOT!

If you are interested, please send me an email. Note that this service isn't running yet, I haven't decided...

- Add new CDROMs
- Get more prices
- Better system for showing compatibility:
State the file system (EG ISO-9660-2) instead of the system used today.
- More reviews of CDROMs
- Include full, longer reviews. I've been working on this, but I thought it's best to release an updated version and wait with the full reviews.

If you have any information about the new CDs, then contact me!

Comments..... Most files are packed with LHA, some with DMS.

 gold-version includes a small fee to the authors
 of the CD. The share-version includes no fee to
 the authors, you are supposed to donate a fee

 Aminet Gold are identical.
 This is the 4th CD in the AMINET-series.

Testers Opinion.. An extra plus for the very good search
 program. The number of programs included on
 both AMINET 3 and 4 is big.
 Seems like a waste of money, if you have AMINET3
 but you can look forward to a very tidy and cool

Testers Opinion.. The contents of the disc isn't particular
 exiting or original, so this isn't one of
 the best PD/SW-collections.
 Rating: two out of five.

(Datormagazin 2/95)

"Even so, 17 Bit do have a quality control policy
 so you're unlikely to find any completely useless
 disks here. On the contrary in fact. Most of these
 are either very useful in the case of serious
 stuff, or very entertaining when it comes to
 games and demos."

Rating: 90%

"The best way to get your hands on the latest
 programs in 17 BIT's impressing catalouge of
 PD software."

Rating: 82%

"If you have the other CDs in the series, then this will
 complement them, but you are left wondering why 17BIT did
 not wait until a few more disks in their collection were
 available."

Testers Opinion.. A necessary disc for those who are
 interrested in DTP and typesetting. The CD

 making it hard to access on an Amiga.

Rating: Five out of five.
 (Datormagazin 2/95)

"The selection, like any compilation, has its bright spots and its clunkers, but GuitarSlinger is on there, which is enough for me." "The sound effects...well, if you like random sound effects, these are for you. The only specific divisions are for Beavis and Butthead (oh boy), Speech, and Effects.  40MB AGA-only demos
 60MB music
 15MB slideshows

Access Software.. German menu-program that allows you to
 decompress the DMS files to floppy, and
 read a short description of the the
 demos before unpacking.

Comments..... Everything is in German. There is only a
 brief documentation in English.

Testers Opinion.. The menu-program is fixed to PAL, and
 users of Graphics-boards can have problems.
 All software is DMS-packed, and must be
 unpacked before it is usable. When using the
 menu-program this is easy, but if not, you
 should have used the Shell and DMS before.
 For demo-people this is exactly the right disc.

Rating: four out of five.

(Datormagazin 2/95)

I was a bit disappointed, because there is only
 270MB of software on this disc. On a CDROM there
 is room for quite a lot more. And to get something
 out of the description-files, you must have some
 knowlegde of German.

Rating: 65%

Testers Opinion.. "If you use Imagine this disc is definitely
worth having. If, however, you work with a variety of
rendering programs (Lightwave and Real3D, for
instance) then the Amiga 3D raytracing volumes (1 & 2)
or the 3D Arena disc are probably better bets as the
offer objects, textures and files for the other Amiga
rendering applications in addition to Imagine."

140 pics
120 games

The demos were collected from various sources besides Aminet, and almost none of them have appeared on previous Aminet CDs. The disks also contains all Amiga Report magazines issued so far. (The last issue is 3.08)

Access Software.. Amigaguide based user interface, allows easy unpacking and viewing using a single mouse click.

Extensive search facilities. Finds words in descriptions or readmes, and outputs matches as an index that allows direct viewing.

New access features for the following categories of files:

- Demos: All demos have been tested. Separate lists of best, good and compatible demos. All demos startable from those indices. Another demo index is the Amiga Demo List with extensive info about almost all demos on the CD. It is sorted by demo group. Finally there is a program called BootTool that allows you to view demos right after areboot without much fuss, so you can quickly look at the demos that force you to reboot.
- Mods: All of the modules are listed in indices sorted by music style and rating. There's also an index sorted by module author and the possibility to randomly play music of a certain style.
- Docs: All Amiga Report electronic magazines that have appeared so far are on this CD, including a utility that allows you to search for any text in any AR article very quickly.
- Personal: Aminet CD 6 allows you to easily create an index of your favourite files on the CD.
- German: All the files (except demos) on Aminet CD 6 have a German description. Also included is an index of the SaarAG disks up to 840.

Other improvements are the possibility to use file requesters to set extraction and tool paths, and 'Clones' which are little programs that, when started, unpack and run/view a file from the Aminet CD.

Comments..... A complete index is found on Aminet in disk/cdrom/Aminet-CD-6.lha

Testers Opinion.. What can I say? Extremely easy to use, hot software, MUCH software. Amazing. No Amiga owner with CDROM should be without the latest Aminet CD.

Comments..... Made for Amiga and Atari.
 The CD has no name, which can makes accessing
 a bit tricky.

Testers Opinion.. This CD-ROM comes in handy when doing DTP work.
 Compared to jewels like AmiNet4 the Sterling
 Connection did a very poor job. From a technical
 point of view this CD is terrible: no volume name,
 upper case filenames, 8 character file-names,
 crippled files, only 381MB used and old software.
 It seems like the CD has been mastered using an
 Atari ST or MS-dos machine and no one ever took
 time to test it with the Amiga. Still I had a lot
 of fun exploring the CD and creating a CD cover
 for it.
 My advice is to wait till it gets real cheap
 and then buy it. At \$ 40 this disc is way overpriced.
