

Overtime Tracking System

Version 1.02

Monday, September 16, 1991

This application is used to keep track of time or overtime worked on projects. I wrote it for myself to keep track of the time I work on individual projects.

It's very simple to use, which is why I didn't write a help system. To add a project entry, simply select the File/Add Project... option and enter the name and description of the project.

Then, to add an overtime item, simply double click on the project entry in the main window, and click on the ADD button. Enter the description of the overtime being worked (128 chars), then enter the starting Time and Date. You can click on the NOW button to put the current time and date in for

you. If you save this entry without entering a stop time and date, the entry will be shown as ACTIVE in the item list. When you complete the overtime work, click on this item from the item list, and click on the NOW button of the end time. When you save the entry, it will be updated in the item list, showing the total amount of overtime worked for that session in HH:MM:SS. A running total is also displayed for the current project.

I have restricted the public domain version to not generate overtime reports. If you wish to have the full functioning version, send a \$45.00 donation to;
