

Future Issues of the Portafilter

For the next issue, I plan to give a full report from the Netscape Internet Developer's Conference. The Java(tm) portions especially.

Also on the agenda is to review several Java(tm) tools. If you have a tool that you would like for me to review, send it to me at the below address, and I will try to get a review of it in the next issue. **Now how's that for free advertising.**
