

DOS Explore 95 v1.0  
© 1995 Firas El-Hasan

DOS Explore 95 adds a new right click menu item to Explorer which allows you to browse the currently selected directory from the MS-DOS Prompt. This can come in handy in many situations. An alternative to DOS Explore 95 would be to open an MS-DOS Prompt from the Start button, and from there manually switch over to the directory which you wish to browse, which could be a long file name directory, which would be even more hectic. DOS Explore simplifies this process...from Explorer, just right click on the directory that you want to browse from the DOS Prompt and select MS-DOS Prompt.

**Directions**

- Start DOS Explore
- Click on the Install button
- To uninstall, click on the Uninstall button

**Misc**

DOS Explore 95 is a freeware program. You are allowed to use it for an unlimited period of time, and you may freely distribute it. If you have any comments, questions, or suggestions, please send them my way. My e-mail address is: FirasE@msn.com.
