STRATOWARE

# Windows Restart 96

QUICK-START DOCUMENTATION

## Summary

Windows Restart 96 is utility program that provides quick ways to perform several system functions. These functions are to shut down, reboot, or log off Microsoft® Windows 95; minimize or restore all windows; cascade (horizontally or vertically) or tile all open windows; display the task list; and open the "My Computer" folder. These actions can be assigned to hot keys or be activated via an icon in the task bar notification area.

## Installation

To install Windows Restart 96, uncompress the distribution file into an empty directory. Run the included SETUP.EXE program. Setup will prompt you to enter the name of the directory to which you wish to copy the Windows Restart 96 files. Setup will copy the files and then create a short cut to the Windows Restart folder in the Programs folder. After Setup completes, Windows Restart will run every time the computer is booted.

## Configuration

Windows Restart's configuration can be changed using the Configuration dialog box. This dialog box can be opened any of several ways: double-click on the "Configure Windows Restart" icon in the Windows Restart folder, pressing a hot key assigned to configuration, or selection "Configuration" from the Windows Restart menu. In the Configuration dialog box, the list titled "Taskbar Icon Action" defines which of Windows Restart's actions are performed when the task bar icon is double-clicked. A popup menu always appears when the icon is left clicked. The icon can be disabled by selecting "Disable" in the list. The twelve other lists define hot keys to the twelve Windows Restart actions.

## Removing Windows Restart

To remove Windows Restart, double-click the "Un-Install" icon in the Windows Restart folder or select "Stratoware Windows Restart 96" in the Add/Remove Programs dialog box in the control panel.

## Shareware License

Jeffrey Carlyle and Stratoware will not be responsible for any loss incurred directly or indirectly from the use or misuse of this program.

Windows Restart is shareware. If you use it for more than 30 days then you should register it. Registration is only $10 and along with the latest version of Windows Restart you will receive a bonus application (at this time it is Stratoware ScratchPad), discounts on registering future versions of Windows Restart, and Stratoware mailings. See then end of this document for more information on registering.

## Author's Comments

Thank you for trying out Windows Restart 96. I would also like to thank everyone who sent me feedback about Windows Restart 95. I used many of your suggestions in creation of this version. I would also like to apologize for the new task bar icon. I decided it was best to stop using the old modified Microsoft® Windows logo and create my own; however, the little icon never turned out right. I had a really great one drawn up, but it looked like a little gray blob when it was in the notification area. I finally compromised to the one I have now, but I am not pleased with it. If you have a better one, send it me. If I do use it in a future version I'll be sure to give you credit for it and send you are free registered copy.

I also need to apologize to those of you who called The Rift BBS looking for support. We designed The Rift to be a maintenance free BBS, so calling it wasn't a lot of help to most of you that called. That is why The Rift is under going renovation as I write this. If you call The Rift looking for something about Stratoware in the future, you won't be disappointed, and most importantly you won't waste any money on long distance.

## Contact Information

Stratoware can be contacted in any of the following ways.

**Electronic mail**
