

HUNGRY HEDGEHOGS

The aim of the game is to get your hungry hedgehog to the juicy worm for a good feed before your opponent does. To do this you must curl up as many of the hedgehogs as you can.

You can curl a single hedgehog if its number is the sum of the numbers on the toadstool. You can curl two hedgehogs if their combined total is the sum of the numbers on the toadstool.

Should you manage to curl all your hedgehogs in a single turn then the game has been won and your hungry hedgehog will automatically eat the juicy worm.

Note: Hedgehogs on the right score more highly than those on the left and consequently move your hungry hedgehog further.

When the game starts two random numbers will be shown on the toadstool. Make your hedgehog selection and press OK, and repeat these steps until you either curl all your hedgehogs or you cannot continue. If you cannot continue press PASS to end your turn and your opponent will have a turn.

To abort the game press QUIT.

Go get that juicy worm...
