2. Credit card type: _____ (Visa, MasterCard, American Express, or Discover).
Card number: _____.
Expiration date: _____.

Thank you!

You can receive your license TODAY!

Note: You can receive your license and registration number(s) the **same day, any day of the week (including weekends and holidays)**, if you register via **E-mail**. Simply copy and paste the above *Registration Form* (page 1 only) into an E-mail message and send it to:

BONZI Software
Attn: Registration Processing
CompuServe: 72053,2227
or Internet: 72053.2227@compuserve.com

You will receive your license and registration number(s) by the end of the day (often within just a few hours).

You'll receive the following:

As a licensed *MergeFax* user, you will receive the following:

- A **permanent license** and **set of registration numbers** that will end the trial period and turn your evaluation copies of *MergeFax* into licensed versions.
- Unlimited free **Technical Support** via electronic mail and a 24-hour fax line.
- **Special discounts on future releases.**
- **Influence on future development.** We welcome your ideas, thoughts, and suggestions for making *MergeFax* more useful. In fact, we'll add them to our "Future Projects List" (large outlines that we use to guide a product's development by breaking it down into goals and sub-goals, features and functions, and other important information). This allows us to, not only *remember* your suggestions, but to *consider them in the right place and time* during the development process.
- **Free updates, patches, and "bug fixes" with same-day notification!** Every time we release new updates, patches, and "bug fixes," we will send you written instructions explaining exactly where to go on-line in order to search for, download, and install these latest and best-performing versions. Updates are free to licensed users, and one of the nicest things is that we notify you *immediately* — via electronic mail or fax — *the very same day* they become available on CompuServe and the other on-line services. This way you'll always have the latest versions within *hours* after we've finished them — red-hot off the presses! In fact, electronic distribution is so fast and slick, you'll be running *MergeFax's* latest versions long before most SysOps have even put them up.

Methods for Registering MergeFax 2.2
