Chapter 1

SwazBlanker/ALoad

1.1 ALoad (11.10.95)

```
SWAZBLANKER : ALoad  
=====
```

```
(C) 1992,93,94 David Swasbrook,  
    All Rights Reserved.
```

```
Introduction          What it actually does  
  
Interface            Configuration preferences  
  
History              Bug fixes and updates
```

1.2 What it actually does...

```
ALoad/Introduction  
=====
```

This blanker monitors CPU loading provided that you have installed the "sysinfo.library" from the "Executive" package (on aminet) and that either "Executive" or another scheduler is running.

1.3 Configuration preferences...

```
ALoad/Interface  
=====
```

```
Save - save and use the current settings.
```

```
Use - use the current settings.
```

```
Test - test the blanker under the current settings
```

Cancel - cancel all changes.

Font - font to use for displaying the text.
Default: System preferred font.

Display Mode - the screen mode to use. If the preferred screen cannot be opened then the default screen mode will be tried, if this fails then the minimum screen mode required for this blanker will be tried, if that fails then the blanker will quit and let SwazBlanker choose an alternative blank method.
Default: Hi-Resolution Laced 1 color.

1.4 Bug fixes and updates...

ALoad/History
=====

'1.0' o Initial release version
