1.2 Bugs

```
                            BUG REPORTS:

If you find a bug in NetFace please let me know.
Write down EXACTLY what you were doing at the time the bug showed up,
your configuration, and anything else that might be relevant.

My address is:
S Chapman
7 Shorncliffe Ave
Norwich
NR3 2HT
Great Britain

I will not reply to any mail unless you include a self-addressed envelope
and stamp(s).

Email

chapman@paston.co.uk
```

1.3 Contact

```
                          CONTACTING ME:

            Email:

                    chapman@paston.co.uk

            My address is:

                    MR.S R Chapman
                   7 Shorncliffe Ave
                        Norwich
                        NR3 2HT
                     Great Britain

I will not reply to any mail unless you include a self-addressed envelope
and stamp(s).
```

1.4 Copyright

```
                        COPYRIGHT-INFORMATION:

NetFace is at present MailWare. If you like this program and are
```

going to use it, You have to send the author a Message.

This can be done via E-Mail, letter,postcard or however you like.

The copyright is owned by the author only.

NetFace can freely be spread for private purpose.
If there is a charge for copying, this charge may not be over £1.00
on a floppy-disk,incl the disk itself.

NetFace may be taken up in public-domain-collections, if those fulfil
the upper conditions.

A commercial use or spreading of NetFace is forbidden and only with
written permission of the author allowed.

The author reserves the right to forbid spreading to everybody,
if he does not follow the copyright-rules.

1.5 Customising

```
                        CUSTOMISING:
```

At present there is no way to customise NetFace.
This well be added in Version 2.00.

The default settings are for,

```
    Start-Net = AmiTCP:Bin/startnet
    Link-Up   = AmiTCP:Bin/Link up
    Link-Down = AmiTCP:Bin/Link Down
    Stop-Net  = AmiTCP:Bin/Stopnet

    Get-News  = AmiTCP:Bin/NNTPTransfer
    Ftp       = AmiTCP:Bin/Gui-Ftp
    WWW       = AmiTCP:Bin/AMosaic-AmiTCP
    Gopher    = AmiTCP:Bin/Gopher

    Newsagent = AmiTCP:Bin/Newsagent
    Prepnews  = AmiTCP:Bin/Prepnews
    IRC       = AmiTCP:Bin/GV
    News-Qued =AmiTCP:bin/newsq
    Mail-Qued = AmiTCP:bin/mailq

    Mail      = AmiTCP:Bin/Elm
    News      = AmiTCP:Bin/Grn height=240 top=10 left=30 wrap=83
```

1.6 Disclaimer

```
                        DISCLAIMER:
```

Although I (the author) have thoroughly tested 'NetFace' and have done

everything possible to make the program reliable, you use it at your own
risk! I am not responsible for any damage caused by using this program,
either direct or indirect.

                        I AM NOT RESPONSIBLE !!!

1.7 Distribution

                              DISTRIBUTION:

'NetFace' may be included in PD. libraries, on coverdisks, on CD's etc.
The only restriction I make is that it may NOT BE SOLD for profit,
and that you keep all the files together.

1.8 Features

                               FEATURES:

             At present there are no special features.

1.9 Future

                          FUTURE ENHANCEMENTS:

* To be able to change default programs by using tooltypes. *

* To do away with iconx and have a listview status window. *

* Not to use CDRun & WBRun. *

* Have a font sensitive and resizeable window. *

* Add inbuilt News-Qued and Mail-Qued. *

* Add inbuilt Newsgroup editor. *

* Add inbuilt Gui Archie. *

* Add inbuilt Mail and News readers. *

* Make the program a commodity. *

* Suggestions?. *

I am hoping that all of the above feature can be added in the next
year or so.

But as these features are added it will become shareware some where

between £5.00 - £20.00 Maximum depending on how many features are added.

The source code will be released when the next major version is released.

1.10 History

```
                          HISTORY:

version 1.1  (Oct 15 1995) : - My version for personal use...

version 1.2  (Nov 03,1995) : - Beta version to gauge response to see
                               if futher development would be welcomed.
```

1.11 Installation

```
                        INSTALLATION:

Follow the instuction included with CDRun and WBRun to install
these two programs otherwise NetFace will not work.

Copy the Xen font over to your Fonts drawer.

Copy the contents of the inclosed bin drawer to your own
AmiTCP:Bin drawer.

The Drawer NetFace1.2beta can be placed anywhere in your system.

                        IMPORTANT

These program must already be working and in your

        AmiTCP:Bin drawer.

  Elm
  GRn
  Gui-Ftp
  Newsagent
  AMosiac-AmiTCP
  Gopher
  GV

  Link script

  You must also have PostNewsSpool installed and working
  properly on your system to use News-Qued.
```

1.12 Introduction

INTRODUCTION:

NetFace is an program which allows control of AmiTCP (Extra programs)
through an easy to use Gui.

This package also allows various applications to be run by clicking on
the relevant buttons.

This was written by myself with help from fellow Amiga users at paston chase.

I wrote this application so that I could easily start and stop AmiTCP without
having to resort to typing commands at the shell or having to set up a menu
on my toolbar.

This version of NetFace allows the user to

 Start/Stop AmiTCP.
 Link Up/Down.
 Run Elm.
 Run GRn.
 Run Gui-Ftp.
 Run Newsagent.
 Run AMosiac.
 Run Gopher.
 Run Grapevine.

 Transfer News items.
 Unbatch & Trim news items. (Prepnews)
 Check for waiting Mail & News item waiting to be sent.

These programs can be started by just clicking on a button,

1.13 SysR

SYSTEM REQUIREMENTS:

    'NetFace' should run on any amiga with at least kickstart 2.0.
  It has been successfully tested on the following configurations:

        A2000 : 1 Mb CHIP, 6 Mb FAST, Kickstart 3.1
