

Game Objective

The objective of 3D Pinball is to launch the ball, and then get as many points as possible by hitting bumpers, targets, and flags. You get three balls, plus bonus balls that you earn when you score.

For more information about playing strategies and the objects on the table, see the Pinball Readme file.

To use your keyboard to play

Press the following keys to play 3D Pinball:

Press	To
z	Move the left flipper
?	Move the right flipper
x	Nudge the table to the left
>	Nudge the table to the right
Up Arrow	Nudge the table up
Spacebar	Launch the ball.

Tips

- You can change the keys by clicking Player Controls on the Options menu.
- The longer you hold the Spacebar, the more powerful the launch.
- Be careful not to nudge the table too much. If you do, it will tilt and the table components will stop working until the ball currently in play drains.
