1.3 _eng.guide/Description

What is URLManager?

URLManager is a MUI application which uses Bookmarks.mcc, a MUI custom class for any type of bookmarks, to manage, edit, import and export your URL hotlists.

The idea of URLManager was born while I'm trying to update my favourite URL addresses at three different computer with different web browser with different hotlists.

Listview, Strings
 =====

The bookmarks are displayed with their title and their URL. Listtree.mcc is used, so you can create groups to collect bookmarks of same kind. BE CAREFULL, not all of the browsers support these groups.

With Drag&Drop you can sort the entries or move them into groups, later it should be possible to drop them on a web browser.

After an entry is selected you can edit it with the string gadgets.

Buttons, Menu
 =====

New Group, Hotkey G
 A new empty group will be created.

New URL, Hotkey N

A new entry will be created.

Duplicate, Hotkey D

The active entry is duplicated.

Remove, Hotkey R

The active entry is removed.

Import

=====

<Cycle Gadget>

Here you can change the kind of the bookmarks file, which should be loaded. If this is set to 'UNKNOWN' URLManager decides.

Load..., Hotkey L, Menu Project/Load...

A filerequester appears, the specified list will be loaded.

Insert..., Hotkey I, Menu Project/Insert...

A filerequester appears, the specified list will be inserted after the active entry. If the active entry is a group, the list is loaded into this group.

Export

=====

<Cycle Gadget>

Here you can change the kind of the bookmarks file, which should be saved.

Save..., Hotkey L, Menu Project/Save...

A filerequester appears, the list will be saved.

Additional Menus

=====

Settings/MUI

The MUI preferences for URLManager appears.

Supported Browser

=====

- * ALynx (Lynx) IMPORT
- * AMosaic (Mosaic) IMPORT GROUPS
- * ASCII
- * AWeb IMPORT EXPORT
- * WebExplorer
- * HTML
- * IBrowse ASCII IMPORT GROUPS
- * IBrowse HTML IMPORT EXPORT GROUPS

```
* Mindwalker ASCII  IMPORT EXPORT GROUPS
* Mindwalker HTML   IMPORT EXPORT GROUPS
* NetScape (Doc-1)  IMPORT          GROUPS
* URLManager ASCII  IMPORT EXPORT GROUPS
* URLManager HTML   IMPORT EXPORT GROUPS
* Voyager           IMPORT EXPORT GROUPS
```

1.4 _eng.guide/Requirements

What you need !

- MUI >= 3.3 (Version 13)
- Bookmarks.mcc >= 12.479
- Listtree.mcc >= 12.241

1.5 _eng.guide/Installation

How to install!

```
copy URLManager/Libs/MUI/Bookmarks.mc(c|p) MUI:Libs/MUI/
copy URLManager/Libs/MUI/Listtree.mc(c|p) MUI:Libs/MUI/
copy URLManager/URLManager(%|.info) <path>
```

1.6 _eng.guide/History

History of URLManager

```
1.0 27.05.96 * first release, Aminet
```

1.7 _eng.guide/ToDo

What is to do in future?

- sort groups
- installer script
- Localization
- Import: WebExplorer
- Import: ASCII
- Import: HTML
- Export: AmigaGuide

1.8 _eng.guide/Credits

Thanks are going to ...

- Stefan Stuntz for his Magic User Interface
- Oliver Wagner, Rüdiger Sopp, Christoph Dietz, Gottfried Janik, Olaf Peters, Fionn Behrens, Markus Lamers
- and all I forgot to mention ...
