   Starting Blacks Editor
      From the Shell
      From Workbench

  Beginners:

   The Standard Configuration
      The Standard Menus
      The Standard Keyboard
      The Standard Mouse Buttons

  Advanced:

   Customizing Blacks Editor
      The definitions file
      The preferences file
```

1.2 Quick Starting

Quick Starting

This section is for you who hate reading documentations and want to
know only the most important things.

So here they are:

<*> You can start BED from the Shell or from the Workbench

<*> The layout of the menus, of the keyboard and the actions to take
    at each mouse click are called definitions, and are specified in
    a file with the ".dfn" extension in the "BED:Support" directory.

<*> A lot of preferences are specified in files with ".prf"
    extension in the "BED:Support" directory

<*> In the "Rexx" directory there are a lot of useful ARexx Macros.
    They can be executed using the ARexx menu.

<*> If not differently specified, BED loads at startup the
    definitions from "BED:Support/Startup.dfn", the preferences from
    "BED:Support/Startup.prf", and executes the ARexx Macro
    "BED:Rexx/Startup.bed", if it exists.

<*> If not differently specified, BED executes at the opening of a
    new window the ARexx Macro "BED:Rexx/Doc_Startup.bed", if it
    exists. In the original configuration this macro does the same
    as "BED:Rexx/SetConfig.bed", i.e. it loads the preferences and
    the definitions according to the current filename extension. You

can, of course, modify or delete this macro.

1.3 Introduction

Introduction

Blacks Editor is a powerful, user-friendly, very configurable text
editor.

The main features are:

* Multi-window. You can have how many opened windows as your memory
  lets.

* Configurability. You can define the layout of the menus, the
  function of every keystroke, the function of every kind of mouse
  click. Moreover, each window can have different definitions.

* A lot of preferences. They are too many to list here... give BED a
  try and see them.

* SAS C Support. You can easily arrange it for any other compiler or
  language.

* Backup. When you save a file, a number of backups can be
  maintained.

* Autosave. Your files can be automatically saved at the interval
  you select.

* Advanced Icon Saving. An icon san be saved, according to the
  filename extension of your file.

* End of Line Handling. You can easily load or save files with EOL
  different from LF, for example files saved on PCs.

* Possibility to use the keyboard in an IBM-style.

* Full Localization (only for 3.0)

* On-line AmigaGuide help (only for 3.0)

* Optional "reqtools.library" or "asl.library" requesters.

* Optional ARexx Macros launched at each BED start, document
  opening, or file opening.

* ARexx support. There are 151 commands, usable in ARexx Macros or
  in the definition of menus, keystrokes and mouse clicks. The main
  abilities are the following:

  - Edit and Move commands
  - Standard Clipboard Function
  - Recorded Macros
  - Paragraph Formatting

```
     - Bookmarks
     - Find & Replace
     - Matching Brackets
     - Undo & Undelete line
     - Run external Tools, DOS Scripts, ARexx Macros
     - Encrypting
     - Open documents without a window (useful for ARexx Macros)

  * And, above all, it's made by ME.

  Give it a try... a look can explain better than thousands of words.
```

1.4 The Author

  This is me...
```

1.5 Blacks Editor Support Web Page

```
  Blacks Editor Support Web Page

  In this WWW page you will find:

  - Updated informations about the status of the developing of
    Blacks~Editor (new versions, minor updates, etc.)

  - The possibility to download the latest official Blacks~Editor
    version.

  - Informations about how to get in touch with the author, how to
    become Beta-Testers, and send contributions such as localizations,
    ARexx macros, and whatever you have done.

  - Continuous support for Beta-Testers, localizers, etc.

  - The possibility to download the latest beta-version (only for
```

Official Blacks Editor Beta-Testers).

URL: http://www.ing.unico.it/~mfontana/www/marco/BED.html

1.6 Credits

Credits

I want to thanks all the people who has contributed to the realisation
of Blacks Editor. This is an extended list of them:

Beta-Testers:

- Mauro Fontana
- Peter Bornhall
- Dave Dustin
- Jeff Lowrance
- Harold H. Ipolyi
- John Gardi
- Paul Schifferer
- Rienhard Katzmann
- Arian Kulp
- Jorge Acereda Macia
- Stephen Hughes

Localizers:

- David Le Corfec (French)
- Radoslaw Chyra (Polish)

Icon and WWW page imagery designer:

- Colin Thompson

Others:

- All the users who sent me a post card or a E-Mail message
- Nico François and Magnus Holmgren, for their wonderful ReqTools
- Mauro Fontana, for the space he gives me for the WWW page
- Andrew Martin, Pavel Troller, for their help
- Commodore, for having invented the Amiga
- Lara, my girlfriend, for having listened to me for months talking
  about window refreshing, IDCMP, ARexx, etc.   ;-)
- Pat Metheny & Mark Knopfler, for their wonderful guitars who
  conforted me in sleepless nights spent on my keyboard.

Well... maybe I'm a bit exaggerating with the credits...

Let's go to see this Blacks Editor, finally...

1.7 Bug Reports

Bug Reports

Even if I don't guarantee anything (read the disclaimer) I think
that BED, at the moment, doesn't contain major bugs (i.e. you don't
have to worry to lose your data).

But if you found some bugs, even minor, or if you have some
suggestions for this or another release of BED, please tell me.

Click here for my address.

1.8 History

History

--- 1.0ß - 14-Jan-96 -------------------------------

First public release. Beta release. OS v39 required.

--- 1.0ß - 28-Jan-96 -------------------------------

First v37 compatible release.

--- 1.00 - 03-Mar-96 -------------------------------

Version working under v37+, but using v39 resources when available.

* IBM-Style keyboard supported.
* Horizontal scroller and optional vertical scroller added.
* Optional ARexx macro executed at each file or document opening
* Possibility to open a document without a window
* "reqtools.library" requesters supported.
* Standard Clipboard supported.
* Customizable font for gadgets.
* Full font-sensitive requesters, with new look.
* Gadget shortcuts in requesters.
* AmigaDOS Protection Bits handling.
* Optional screen pop-up at document opening.
* Customizable number of lines to jump with JUMPSCROLL
* Indent (also automatic) supported in paragraph formatting.
* RIGHT_AMIGA qualifier added.
* GetLastDoc command added.
* Print functions fixed.
* Tab conversion functions fixed.

--- 1.01 - 01-Apr-96 -------------------------------

Minor update. Some bugs fixed.

* Last v39 function calls trapped. They caused BED to guru when a
  block was selected or a requester with cycle or palette gadgets
  was closed.

* ASL tags specified in a v37-compatible manner.
* Under v37 & 38 the window borders are no more erased.
* The coversion from tabs to spaces when printing has been fixed.
* Many other minor bugs fixed.
* The documentation now cover the standard menu items description.

1.9 Future

Future

First of all I have to finish this documentation...

The ideas for next version are:

<*> Full Undo.

<*> ToolManager-like Docks, or simple groups of gadgets (of course
    user-definable) for each window

<*> Word colouring

<*> More and more ARexx Macros, for syntax checking, auto-indenting,
    etc.

<*> Custom Progress Indicator support

<*> Implementation of the #LINKS keyword in the definitions file,
    which includes another file, something like the #include
    directive in C

<*> ... and whatever you will suggest me

1.10 Before you begin

Before you begin it's better if you read something about...

    Distribution

    Hardware requirements

    Installation

1.11 Distribution

Distribution

Blacks Editor v1.01 - By Marco Negri - 01-Apr-1996

This entire package is designated "SolidarityWare" that is you can
try it for a period of 30 days, after which if you like it and use
it you have to make a "Solidarity Offer" of 15$ (or whatever you can
and want), for example, to your local Association for the Research
For The Cure Of Cancer, and to send me a post card of your country
or a message by E-Mail because I'd like to know where my program is
used.

Of course I will not make any control on this and the program will
work anyway, but I hope that many of you will follow my indication.

You may freely copy and distribute this package as often as you
like, with the following limitations:

* ReqTools is Copyright (c) by Nico François and Magnus Holmgren

* The package must remain complete and unchanged

* The package can be included on CD-ROMs, BBS, magazines, but I ask
  you to inform the Author.

* It is expressly forbidden to use this program, or any programs or
  data developed using this program to directly or indirectly
  benefit the military.

1.12 Disclaimer

Disclaimer

THIS PROGRAM IS PROVIDED ON AN "AS IS" BASIS, NO WARRANTIES ARE
MADE, EITHER EXPRESSED OR IMPLIED. IN NO EVENT WILL I, MARCO NEGRI,
BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL
DAMAGES ARISING FROM ANY USE OR MISUSE OF THIS PROGRAM. THE ENTIRE
RISK AS TO THE RESULTS AND PERFORMANCE OF THIS PROGRAM IS ASSUMED BY
YOU.

1.13 Hardware requirements

Hardware Requirements

* An Amiga   ;-)
* OS 2.04+ (v37)
* "reqtools.library" v38+ (needed for OS 2.04 (v37), optional for OS 2.1+ (v38+) ↩
)
* Commodore Installer (needed only for the installation)

(Recommended for better use)

* A Hard Disk
* ARexx running

1.14   Installation

```
Installation
```

To install Blacks Editor simply open the Install drawer and
double-click on the icon of your language.

A Standard Installer Script will guide you through the short
installation process.

1.15   Starting Blacks Editor

```
Starting Blacks Editor
```

Blacks Editor can be started either from WB or from the Shell.

```
    Starting from the Shell

    Starting from Workbench
```

1.16   Starting from the Shell

```
From the Shell
```

If you want to run Blacks Editor from the Shell you just have to
type:

```
  BED
```

followed by these optional arguments

```
FILENAME,DEFS/K,PREFS/K,MACRO/K,QUIT/S
```

1.17   Starting from the Workbench

```
From the Workbench
```

If you want to run Blacks Editor from the Workbench you have to
double click on the BED icon or on any Project Icon with BED as
Default Tool.

The following Tooltypes are supported:

```
 FILENAME  - File to edit
 DEFS      - Definitions file
 PREFS     - Preferences file
 MACRO     - Macro to execute at startup
 QUIT      - Quit BED
```

1.18 FILENAME

FILENAME

FILENAME: If a filename is specified then this file is loaded in
           the first document window. If there is a copy of BED
           running, then it will open a new document window and load
           the specified file.

1.19 DEFS/K

DEFS

DEFS/K: If a defs file is specified then the definitions are
           loaded from it. It defaults to BED:Support/Startup.dfn.

1.20 PREFS/K

PREFS

PREFS/K: If a prefs file is specified then the preferences are
           loaded from it. It defaults to BED:Support/Startup.prf

1.21 MACRO/K

MACRO

MACRO/K: If this argument is specified then the ARexx Macro is
           executed. It defaults to BED:Support/Startup.bed

1.22 QUIT/S

QUIT

QUIT/S: When there is a copy of BED running, this switch force
           him to quit.

1.23 The Standard Configuration

Standard configuration

This is the standard configuration of Blacks Editor, and can be
found in the definition file BED:Support/Standard.dfn.

This file define the menus, the keyboard sequences and the actions
to take at each type of mouse click.

      The Standard Menus

      The Standard Keyboard

      The Standard Mouse Buttons

1.24   Standard Menus

Standard menus:

This section contains a description of the standard menu items.

 The File Menu
 The Window Menu
 The Edit Menu
 The Find Menu
 The Format Menu
 The Extras Menu
 The Macro Menu
 The Tools Menu
 The ARexx Menu
 The Settings Menu
 The ? Menu

1.25   Menu name: File

The File Menu:

New Doc
Opens a new document window.

Clear File
Clears the buffer of the current document.

Open File...
Opens a file requester, and the specified file is loaded into the
current document window. If the current file has been modified a
confirmation requester appears.

Open New Doc...
Opens a new document window and a file requester, allowing you to
load a file into the new document.

Insert File...
Opens a file requester, and the specified file is loaded and
inserted into the current document at the cursor position.

Save File
Saves the file with the current filename.

```
Save File As...
Opens a file requester, and the file is saved with the specified
filename. It a file with the same filename already exists a
confirmation requester appears.

Save & Close
Saves the file with the current filename, then the document window
is closed.

Print File...
Prints the current file. A confirmation requester appear.

Close Doc...
Closes the current document window.

Quit
All the opened document windows are closed, and the program quits.
```

1.26   Menu name: Window

```
The Window Menu:

Select...
Displays a list of all the opened documents, and the specified one
is activated and brought to front.

Minimize
The current document window is resized to the minimum dimensions

Maximize
The current document window is resized to the maximum dimensions

Normalize
The current document window is resized to the normal dimensions (as
specified by the DEFAULTWINDOW preference).

Snapshot
Sets the dimensions of the current document window as the default
normal dimensions.

Iconify
Iconifies the current document window.

Iconify All
Iconifies all the document windows.

Tile
Reorganizes the windows on the screen as tiles.

Stack
Reorganizes the windows on the screen as stack.

Cascade
Reorganizes the windows on the screen as cascade.
```

Open Desktop...
Opens a file saved with "Save Desktop As...", and restore the
desktop as described in the file.

Save Desktop As...
The dimension, position, and filename of all the documents are
stored into the file specified with the file requester.

1.27 Menu name: Edit

The Edit Menu:

Mark Block
Mark the start of a selection block. If a block is already selected,
the block is de-selected.

Select Word
The word under the cursor is selected.

Select Line
The current line is selected.

Select All
The whole document is selected.

Cut
The selected block is erased and copied into the clipboard.

Copy
The selected block is copied into the clipboard.

Paste
The contents of the clipboard is inserted at the cursor position.

Erase
The selected block is erased.

Cut Append
The selected block is erased and appended at the end of the
clipboard.

Copy Append
The selected block is appended at the end of the clipboard.

Open Clip...
The specified file is loaded and inserted into the clipboard.

Save Clip As...
The contents of the clipboard is saved with the specified filename.

Print Clip...
The contents of the clipboard is printed. A confirmation requester
appears.

1.28   Menu name: Find

The Find Menu:

Find...
Opens the Find requester.

Find Next
Find the next match of the current find string.

Find & Replace...
Opens the Find & Replace requester.

Replace Next
Find the next match of the current find string and replaces it with
the current replace string.

Goto Line...
Opens a requester asking the line number to move the cursor to.

Match Bracket
When the cursor is on a bracket, it moves to the matching one. At
the moment the following bracket types are supported: { [(< « » >
)] }

Set Bookmark
Set the specified bookmark at the current cursor position.

Goto bookmark
Moves The cursor to the specified bookmark

1.29   Menu name: Format

The Format Menu:

Format Paragraph
The paragraph under the cursor is formatted, according to the
LeftMargin, RightMargin, Indent, LeaveIndent, RightMarginWBorder
preferences. This means that extra spaces ot tabs between words are
removed, and every line is filled with as many words as possible.

Goto paragraph - Previous/Next
Moves the cursor at the start of previous/next paragraph.

Documentize
Every paragraph of the document is put on a single line, removing
the line feeds. This command is useful before loading the file into
a word processor.

Left Justify
The selected block (or the current line) are justified along the
left margin, according to the LeftMargin preference.

Right Justify

The selected block (or the current line) are justified along the
right margin, according to the RightMargin preference.

L/R Justify
The selected block (or the current line) are justified along both
margins, according to LeftMargin and RightMargin preference. This
means that spaces are inserted/removed to line up the line/s along
left and right margins.

Tabs -> Spaces
The tabulations are expanded into spaces. This command affects the
selected block, or the whole document.

Spaces -> Tabs
The spaces are converted into tabulations. This command affects the
selected block, or the whole document.

Remove EOL Blanks
The spaces and tabulations at the end of the lines are removed. This
command affects the selected block, or the whole document.

Indent Block
A tabulation is added at the start of the line/s. This command
affects the selected block, or the whole document.

Unindent Block
A tabulation is removed (if present) at the start of the line/s.
This command affects the selected block, or the whole document.

Indent Line
A tabulation is added at the start of the current line.

Unindent Line
A tabulation is removed (if present) at the start of the current
line.

1.30   Menu name: Extras

The Extras Menu:

Undo Line
The line is restored as is was when the cursor was moved onto it.

Undelete Line
The last deleted line is inserted at the current cursor position.

Insert Current Date
The current date is inserted at the current cursor position.

Insert Current Time
The current time is inserted at the current cursor position.

Insert ASCII Char...
Opens a requester asking the ASCII code of the character to insert
at the current cursor position.

Insert Version String
Insert a version string at the current cursor position. The filename
and date are automatically inserted, you only have to insert the
version number.

Comment Block
The selected block marked as comment. The current comment type is
C-style, but you can change it modifying the "CommentBlk.bed" macro.

Number Lines
Insert the line number at the start of every line of the selected
block (or of the whole document).

Word -> Lower Case
Converts the word under the cursor to lower case.

Word -> Upper Case
Converts the word under the cursor to upper case.

Toggle Char Case
Toggle the case of the character under the cursor.

Encrypt Block
Encrypt the selected block (or the whole document) with the
caesarian algorithm. This means that it exchanges the letters A-M
with the letters N-Z. Applying the encryption twice gives the
original file.

1.31   Menu name: Macro

The Macro Menu:

Start Recording
Starts recording a macro. Every action will now be recorded.

Stop recording
Stops recording a macro. The macro can now be re-executed many
times.

Play Macro
Executes the recorded macro once.

Play Many...
Opens a requester asking how many times to execute the recorded
macro. If you enter 0, the macro will be continually executed until
an error is encountered.

Open Macro...
A previously saved macro can be loaded. (Remember that you can use a
saved recorded macro as an ARexx macro but, usually, not viceversa.

Save Macro As...
The recorded macro is saved as an ASCII file, which can be executed

```
also as ARexx macro.
```

1.32   Menu name: Tools

```
Tools:

New Shell...
Opens a new standard Amiga Shell, whose path is set as the current
file path. The specification of the window is specified by the
Console preference.

New Console...
Opens a new BED console. From here you can enter directly any BED
command, who is sent to the current document. The specification of
the window is specified by the Console preference.

Exec Tool...
The specified tool is executed synchronously.

Run Tool...
The specified tool is executed asynchronously.

Exec DOS Script
The specified DOS script is executed.

Calculator
The standard Amiga calculator is launched.

Multiview
The Multiview application is launched.

...
Here you can insert your mostly used tools
```

1.33   Menu name: ARexx

```
The ARexx Menu:

Exec ARexx Macro...
Executes the specified ARexx macro.

Exec ARexx String...
Executes the specified ARexx string.

  AddChars
  CountWords
  ExecBlk
  PrintBlk
  RemoveBlankLines
  SaveBlk
  SaveChangedDocs
  SetConfig
```

```
    ShowAG
    SortBlk
    UnSetLocks

...
Here you can insert your mostly used ARexx Macros.
```

1.34   Menu name: Settings

```
The Settings Menu:

Change Prefs
Opens the requester to edit the following preferences:

   Auto-Save
   Backup
   Colors
   Display
   Edit
   End Of Line
   Fonts
   Icons
   Miscellanea
   Tabs

Open Prefs...
Loads the preferences from the specified filename.

Save Prefs...
Saves the preferences with the specified filename.

Save Prefs As Default
Saves the preferences as "BED:Support/Startup.prf", so they will be
loaded as default preferences next time BED is run.

Open Definitons...
Loads the definitions from the specified file.
```

1.35   Menu name: ?

```
?:

About BED
Gives you informations about the Author and your system.

Quick Reference
Displays the AmigaGuide file with a quick reference to BED. about
BED.

BED Menus
Displays the AmigaGuide help about the standard menus.
```

```
BED Commands
Displays the AmigaGuide help about the BED command under the cursor.

BED Main Help
Displays the main BED AmigaGuide Help file.
```

```
Quick reference for Blacks Editor

IMPORTANT !!! These three keyboard sequences are always valid:
--------------------------------------------------------------

[Ctrl]-[Shift]-[Alt]-F1   Restore the built-in default definitions (menus, keys, ←
    etc...)
[Ctrl]-[Shift]-[Alt]-F2   Restore the built-in default preferences
[Ctrl]-[Shift]-[Alt]-F3   Remake the screen

Standard keybard sequences:
---------------------------

[Return]                Insert a line
[Enter]                 Insert a line with indent
[Backspace]             Delete the previous character
[Del]                   Delete the current character
[Tab]                   Insert a tab
[Esc]
[Help]                  This help

[CursorUp]              Move the cursor up by one line
```

```
[CursorDown]            Move the cursor down by one line
[CursorRight]           Move the cursor right by one character
[CursorLeft]            Move the cursor left by one character

[F1]                    Open a new document
[F2]                    Open a new file in the current document
[F3]                    Find matching bracket
[F4]                    Open the Command Shell
[F5]                    Open a DOS Shell
[F6]                    Move the cursor to the start of previous paragraph
[F7]                    Move the cursor to the start of next paragraph
[F8]                    Indent the selected block
[F9]                    Save the current file if modified
[F10]                   Activate the next document and bring it to front

[Shift]-[Return]        Insert a line without breaking the current line
[Shift]-[Enter]         Insert a line with indent without breaking the current  ←
    line
[Shift]-[BackSpace]     Delete to the start of the current word
[Shift]-[Del]           Delete to the end of the current word
[Shift]-[Tab]           Move to the previous tab stop on the current line
[Shift]-[Esc]
[Shift]-[Help]          Display the General Blacks Editor Help

[Shift]-[CursorUp]      Move the cursor up by one screenful
[Shift]-[CursorDown]    Move the cursor down by one screenful
[Shift]-[CursorRight]   Move to the start of the next word
[Shift]-[CursorLeft]    Move to the start of the previous word

[Shift]-[F1]            Display the General Blacks Editor Help
[Shift]-[F2]            Open a new file in a new document
[Shift]-[F3]            Undo the current line
[Shift]-[F4]            Restore the window default position
[Shift]-[F5]            Iconify / Deiconify the current document window
[Shift]-[F6]            Format the current paragraph
[Shift]-[F7]            Justify current paragraph
[Shift]-[F8]            Unindent the selected block
[Shift]-[F9]            Save the current file with a different name

O/o Overstrike (O=On, o=Off)
W/w Word Wrap (W=On, w=Off)
J/j Jump Scroll (J=On, j=Off)
B/b Create Backups (B=On, b=Off)
K/k IBM Keyboard (K=On, k=Off)

1.45 Commands Reference

Commands Reference

Blacks Editor 1.0 supports 150 ARexx commands.

You can use these commands to write your own definition file, to
modify an existing one, or to write ARexx Macros.

The global commands are the only who can be sent to the general
ARexx port called BED. The others can only be sent to the specific
ARexx port of some document.

The commands are listed according different criteria:

    Alphabetical order

    Functional groupings

    Global commands

1.46   Alphabetical List of Commands

Alphabetical List of Commands

```
About            - Bring up the About requester
ActivateLastDoc  - Activates and bring to front the last document
ActivateNextDoc  - Activates and bring to front the next document
ActivatePrevDoc  - Activates and grong to front the previous document
ActivateWindow   - Activates the window of the current document
BackSpace        - Delete the character before the cursor
BeepScreen       - Flashes the screen
Center           - Center the current paragraph
CenterView       - Center vertically the current line
ClearBookMark    - Clear the specified bookmark
ClearFile        - Clears the current file
CloseDoc         - Closes the current document
ControlWindow    - Toggle between open and close document window
Conv2Lower       - Convert the character to lower case
Conv2Spaces      - Convert the tabs to spaces
Conv2Tabs        - Convert the spaces to tabs
Conv2Upper       - Convert the character to upper case
CopyBlk          - Copy the selected block to the clipboard
CutBlk           - Copy the selected block to the clipboard and erase it
Delete           - Delete the character under the cursor character
DeleteBlk        - Erase the selected block
DeleteEOL        - Delete from the cursor to the end of the line
DeleteEOF        - Delete from the cursor to the end of the file
DeleteEOW        - Delete from the cursor to the end of the word
DeleteLine       - Delete the current line
DeleteSOL        - Delete from the cursor to the start of the line
DeleteSOF        - Delete from the cursor to the start of the file
DeleteSOW        - Delete from the cursor to the start of the word
DeleteWord       - Delete the word under the cursor
EncryptBlk       - Encrypt the selected block
EndMacro         - Stops the recording of a macro
ExecARexxMacro   - Execute am ARexx script
ExecARexxString  - Execute an ARexx string
ExecDosScript    - Execute a DOS script
ExecTool         - Execute syncronously a Tool
Exist            - Check if a the specified command is supported by BED
ExistsFile       - Check if a file exists
Find             - Search in the current document for the specified string
FindChange       - Search in the current document for the specified string and ←
    replace it with another
FormatParagraph  - Format the current paragraph
GetBlk           - Return the text in the selected block
```

```
GetBlkDims        - Return info about the selected block
GetBlkInfo        - Return info about the selected block
GetChar           - Return the current character
GetCurrentDir     - Return the name of the current dir
GetCursorPos      - Return info about the current position of the cursor
GetDocuments      - Return the names of the documents and their ARexx port name
GetErrorInfo      - Return the string of the specified error code
GetFileInfo       - Return info about the current document
GetFilePath       - Return the path and/or filename of the current document
GetLastDoc        - Return the ARexx port name of the last edited document
GetLine           - Return the text of the current line
GetLockInfo       - Return info about the locks
GetMacroInfo      - Return info about the current macro recorded
GetPort           - Return the ARexx port name of a document
GetPrefs          - Return the value of the specified preference
GetPriority       - Return the task priority of BED
GetScreenInfo     - Return info about the screen
GetTemplate       - Return the template of the specified command
GetVersion        - Return the version string of BED
GetViewInfo       - Return info about the current view
GetWindowInfo     - Return info about the current document window
GetWindowSpec     - Return the specification of the current document window
GetWord           - Return the word under the cursor
Help              - Display an AmigaGuide document with an help about the  ←
     specified topic
IconifyWindow     - Iconify/uniconify the current document window
Illegal           - Produces an error
Insert            - Insert the specified string in the document
InsertTab         - Insert a tab in the text
InsertFile        - Insert a file in the document
InsertLine        - Insert a new line in the document
Justify           - Justify the current paragraph
LeftJustify       - Left justify the current paragraph
MarkBlk           - Mark the start of the selection block
Move              - Move the cursor to the specified line and/or column
MoveBookMark      - Move the cursor to the specified bookmark
MoveDown          - Move the cursor down one or more lines line
MoveDownScr       - Move the cursor down one page
MoveEOF           - Move the cursor to the end of the document
MoveEOL           - Move the cursor to the end of the current line
MoveEOW           - Move the cursor to the end of the word
MoveLeft          - Move the cursor left one or more characters
MoveMatchBkt      - Move the cursor on the matching bracket
MoveNextTabStop   - Move the cursor to the next tab stop position
MoveNextWord      - Move the cursor to the start of the next word
MovePrevTabStop   - Move the cursor to the previous tab stop
MovePrevWord      - Move the cursor to the start of the previous word
MoveRight         - Move the cursor right one or more characters
MoveSizeWindow    - Change the dimensions and position of the current document  ←
     window
MoveSOF           - Move the cursor to the start of the file
MoveSOL           - Move the cursor to the start of the current line
MoveSOW           - Move the cursor to the start of the current word
MoveUp            - Move the cursor up one or more lines
MoveUpScr         - Move the cursor up one page
MoveWindow        - Change the position of the current document window
NewShell          - Opens a new shell
```

```
Nop              - Absolutely nothing
OpenClip         - Load the specified file in the clipboard
OpenDefinitions  - Load the specified definitions file for the current document
OpenDoc          - Open a new document
OpenFile         - Load the specified file in the current document
OpenMacro        - Load the specified macro
OpenPrefs        - Load the specified preference file for the current document
OpenRequester    - Open the specified requester
PasteClip        - Paste the clipboard in the current document
PlayMacro        - Play the recorded macro
PrintClip        - Print the contents of the clipboard
PrintFile        - Print the current document
Quit             - Close all the documents and exit
RecordMacro      - Start recording a macro
RemakeScreen     - Remake the screen
RequestBool      - Open a bool requester
RequestChoice    - Open a requester with multiple choices
RequestFile      - Open a file requester
RequestFont      - Open a font requester
RequestNum       - Open a number requester
RequestStr       - Open a string requester
RightJustify     - Right justify teh current paragraph
RunTool          - Run asynchronously the selected Tool
SaveClip         - Save the contents of the clipboard in a file
SaveDefPrefs     - Save the preferences on disk, as defaults
SaveFile         - Save the current document
SaveFileAs       - Save the current document with a different filename
SaveMacro        - Save the currently recorded macro
SavePrefs        - Save the preferences on disk
Screen2Back      - Move the screen to back
Screen2Front     - Move the screen to front
ScrollVert       - Scroll vertically keeping the cursor in the same position
ScrollView       - Scroll vertically the current view
SelectLine       - Select the currrent line
SetBookMark      - Set the specified bookmark
SetChar          - Set the char under the cursor
SetCurrentDir    - Set the current directory
SetDisplayLock   - Set the lock on the display of the current file
SetFilePath      - Set the path of the curret document
SetInputLock     - Set the lock on the input in the current document
SetPrefs         - Set the specified preference
SetPriority      - Set the task priority of BED
SetQuoteMode     - Set the quote mode
SetStatusBar     - Display the specified string in the status bar
SetWindowSpec    - Dimension the current document window according to the  ←
    specification
ShiftLeft        - Shift left the current line one or more characters or tabs
ShiftRight       - Shift right the current line one or more characters or tabs
SizeWindow       - Change the dimensions of the current document window
StripEOLBlanks   - Strip all the blanks at the end of the lines
SwapChars        - Swap the character under the cursor with the next
Text             - Insert the specified string in the current document
ToggleCharCase   - Toggle the upper/lower case of the character under the  ←
    cursor
UndeleteLine     - Undelete the current line
UndoLine         - Undo all the changes on the current line
Window2Back      - Move the current document window to back
```

```
    Window2Front       - Move the current document window to front
```

1.47 Functional Grouping of Commands

```
Functional Grouping of Commands

Commands dealing with load & save

    ExistsFile         - Check if a file exists
    GetFileInfo        - Return info about the current document
    GetFilePath        - Return the path and/or filename of the current document
    InsertFile         - Insert a file in the document
    OpenFile           - Load the specified file in the current document
    PrintFile          - Print the current document
    SaveFile           - Save the current document
    SaveFileAs         - Save the current document with a different filename
    SetFilePath        - Set the path of the curret document

Commands dealing with the editing

    BackSpace          - Delete the character before the cursor
    Delete             - Delete the character under the cursor character
    DeleteEOL          - Delete from the cursor to the end of the line
    DeleteEOF          - Delete from the cursor to the end of the file
    DeleteEOW          - Delete from the cursor to the end of the word
    DeleteLine         - Delete the current line
    DeleteSOL          - Delete from the cursor to the start of the line
    DeleteSOF          - Delete from the cursor to the start of the file
    DeleteSOW          - Delete from the cursor to the start of the word
    DeleteWord         - Delete the word under the cursor
    Insert             - Insert the specified string in the document
    InsertTab          - Insert a tab in the text
    InsertLine         - Insert a new line in the document
    ShiftLeft          - Shift left the current line one or more characters or tabs
    ShiftRight         - Shift right the current line one or more characters or ←
        tabs
    Text               - Insert the specified string in the current document
    UndeleteLine       - Undelete the current line
    UndoLine           - Undo all the changes on the current line

Commands dealing with cursor movements

    GetCursorPos       - Return info about the current position of the cursor
    Move               - Move the cursor to the specified line and/or column
    MoveDown           - Move the cursor down one or more lines line
    MoveDownScr        - Move the cursor down one page
    MoveEOF            - Move the cursor to the end of the document
    MoveEOL            - Move the cursor to the end of the current line
    MoveEOW            - Move the cursor to the end of the word
    MoveLeft           - Move the cursor left one or more characters
    MoveMatchBkt       - Move the cursor on the matching bracket
    MoveNextTabStop    - Move the cursor to the next tab stop position
    MoveNextWord       - Move the cursor to the start of the next word
    MovePrevTabStop    - Move the cursor to the previous tab stop
    MovePrevWord       - Move the cursor to the start of the previous word
```

```
    MoveRight         - Move the cursor right one or more characters
    MoveSOF           - Move the cursor to the start of the file
    MoveSOL           - Move the cursor to the start of the current line
    MoveSOW           - Move the cursor to the start of the current word
    MoveUp            - Move the cursor up one or more lines
    MoveUpScr         - Move the cursor up one page
    ScrollVert        - Scroll vertically keeping the cursor in the same position
    ScrollView        - Scroll vertically the current view

Commands dealing with bookmarks

    ClearBookMark     - Clear the specified bookmark
    MoveBookMark      - Move the cursor to the specified bookmark
    SetBookMark       - Set the specified bookmark

Commands dealing with special edit functions

    ClearFile         - Clears the current file
    Conv2Lower        - Convert the character to lower case
    Conv2Spaces       - Convert the tabs to spaces
    Conv2Tabs         - Convert the spaces to tabs
    Conv2Upper        - Convert the character to upper case
    EncryptBlk        - Encrypt the selected block
    SetChar           - Set the char under the cursor
    StripEOLBlanks    - Strip all the blanks at the end of the lines
    SwapChars         - Swap the character under the cursor with the next
    ToggleCharCase    - Toggle the upper/lower case of the character under the  ←
        cursor

Commands dealing with selection block and the clipboard

    CopyBlk           - Copy the selected block to the clipboard
    CutBlk            - Copy the selected block to the clipboard and erase it
    DeleteBlk         - Erase the selected block
    GetBlk            - Return the text in the selected block
    GetBlkDims        - Return info about the selected block
    GetBlkInfo        - Return info about the selected block
    MarkBlk           - Mark the start of the selection block
    OpenClip          - Load the specified file in the clipboard
    PasteClip         - Paste the clipboard in the current document
    PrintClip         - Print the contents of the clipboard
    SaveClip          - Save the contents of the clipboard in a file
    SelectLine        - Select the currrent line

Commands dealing with search & replace

    Find              - Search in the current document for the specified string
    FindChange        - Search in the current document for the specified string  ←
        and replace it with another

Commands dealing with formatting of paragraph

    Center            - Center the current paragraph
    FormatParagraph   - Format the current paragraph
    Justify           - Justify the current paragraph
    LeftJustify       - Left justify the current paragraph
    RightJustify      - Right justify teh current paragraph
```

Commands dealing with recorded macros

```
    EndMacro         - Stops the recording of a macro
    GetMacroInfo     - Return info about the current macro recorded
    OpenMacro        - Load the specified macro
    PlayMacro        - Play the recorded macro
    RecordMacro      - Start recording a macro
    SaveMacro        - Save the currently recorded macro
```

Commands dealing with external Tools or ARexx macros

```
    ExecARexxMacro   - Execute am ARexx script
    ExecARexxString  - Execute an ARexx string
    ExecDosScript    - Execute a DOS script
    ExecTool         - Execute syncronously a Tool
    NewShell         - Opens a new shell
    RunTool          - Run asynchronously the selected Tool
```

Commands dealing with the configuration of the program

```
    GetPrefs         - Return the value of the specified preference
    OpenDefinitions  - Load the specified definitions file for the current  ←
        document
    OpenPrefs        - Load the specified preference file for the current  ←
        document
    SaveDefPrefs     - Save the preferences on disk, as defaults
    SavePrefs        - Save the preferences on disk
    SetPrefs         - Set the specified preference
```

Commands dealing with windows ands screen

```
    ActivateLastDoc  - Activates and bring to front the last document
    ActivateNextDoc  - Activates and bring to front the next document
    ActivatePrevDoc  - Activates and grong to front the previous document
    ActivateWindow   - Activates the window of the current document
    BeepScreen       - Flashes the screen
    ControlWindow    - Toggle between open and close document window
    GetScreenInfo    - Return info about the screen
    GetWindowInfo    - Return info about the current document window
    GetWindowSpec    - Return the specification of the current document window
    IconifyWindow    - Iconify/uniconify the current document window
    MoveSizeWindow   - Change the dimensions and position of the current document ←
        window
    MoveWindow       - Change the position of the current document window
    RemakeScreen     - Remake the screen
    Screen2Back      - Move the screen to back
    Screen2Front     - Move the screen to front
    SetStatusBar     - Display the specified string in the status bar
    SetWindowSpec    - Dimension the current document window according to the  ←
        specification
    SizeWindow       - Change the dimensions of the current document window
    Window2Back      - Move the current document window to back
    Window2Front     - Move the current document window to front
```

Commands dealing with views

```
    CenterView        – Center vertically the current line
    GetViewInfo       – Return info about the current view

  Commands dealing with documents

    CloseDoc          – Closes the current document
    GetDocuments      – Return the names of the documents and their ARexx port  ←
        name
    GetLastDoc        – Return the ARexx port name of the last edited document
    GetPort           – Return the ARexx port name of a document
    OpenDoc           – Open a new document
    Quit              – Close all the documents and exit

  Command allowing input in ARexx Macros

    RequestBool       – Open a bool requester
    RequestChoice     – Open a requester with multiple choices
    RequestFile       – Open a file requester
    RequestFont       – Open a font requester
    RequestNum        – Open a number requester
    RequestStr        – Open a string requester

  Commands dealing with text in ARexx macros

    GetChar           – Return the current character
    GetLine           – Return the text of the current line
    GetWord           – Return the word under the cursor

  Commands useful when developing ARexx Macros

    Exist             – Check if a the specified command is supported by BED
    GetErrorInfo      – Return the string of the specified error code
    GetTemplate       – Return the template of the specified command
    GetVersion        – Return the version string of BED
    Help              – Display an AmigaGuide document with an help about the  ←
        specified topic
    Illegal           – Produces an error
    Nop               – Absolutely nothing

  Miscellanea commands

    About             – Bring up the About requester
    GetCurrentDir     – Return the name of the current dir
    GetPriority       – Return the task priority of BED
    OpenRequester     – Open the specified requester
    SetCurrentDir     – Set the current directory
    SetPriority       – Set the task priority of BED
    SetQuoteMode      – Set the quote mode
```

1.48 List of Global Commands

```
List of Global Commands

 ActivateLastDoc  – Activates and bring to front the last document
 ActivateNextDoc  – Activates and bring to front the next document
```

```
ActivatePrevDoc  - Activates and grong to front the previous document
ActivateWindow   - Activates the window of the current document
BeepScreen       - Flashes the screen
ExecARexxMacro   - Execute am ARexx script
ExecARexxString  - Execute an ARexx string
ExecDosScript    - Execute a DOS script
ExecTool         - Execute syncronously a Tool
Exist            - Check if a the specified command is supported by BED
ExistsFile       - Check if a file exists
GetCurrentDir    - Return the name of the current dir
GetDocuments     - Return the names of the documents and their ARexx port name
GetErrorInfo     - Return the string of the specified error code
GetLastDoc       - Return the ARexx port name of the last edited document
GetPort          - Return the ARexx port name of a document
GetPriority      - Return the task priority of BED
GetScreenInfo    - Return info about the screen
GetTemplate      - Return the template of the specified command
GetVersion       - Return the version string of BED
Help             - Display an AmigaGuide document with an help about the  ←
   specified topic
Illegal          - Produces an error
Nop              - Absolutely nothing
OpenDoc          - Open a new document
Quit             - Close all the documents and exit
RemakeScreen     - Remake the screen
RunTool          - Run asynchronously the selected Tool
Screen2Back      - Move the screen to back
Screen2Front     - Move the screen to front
SetCurrentDir    - Set the current directory
SetPriority      - Set the task priority of BED
```

1.49 About

```
Command name:   About

Format:         About

Release:        Version 1.00

Purpose:        Bring up the About requester

Parameters:     None

Description:

RC:             Always 0

RESULT:         No result returned.

1.281   Errors Reference

Errors Reference

This is the reference for error codes and messages.

The first list contains the errors caused during the normal use of
the program, the second and the third contain errors occurred while
parsing, respectively, definitions and preferences files.

    Blacks Editor errors

    Definitions file errors

    Preferences file errors

1.282   BED Errors

BED Errors

1   Error #1
2   Error #2
3   Error #3
4   Error #4
5   Error #5
6   Error #6

```
 7   Hit document boundary
