

MOTO RACER WORLD TOUR

London, May 2000 – Sony Computer Entertainment join forces with Delphine Software to bring PAL gamers the ultimate motorcycling event simulation ever - Moto Racer World Tour, due for release in Autumn 2000.

Moto Racer World Tour offers gamers a unique range of realistic bike racing including street, speed-track, motocross & supercross. In true simulation style players choose from 125cc, 250cc and 500cc class bikes, each with realistic handling and vehicle behaviour. Incredibly detailed rider animations will keep gamers at the edge of their seats as they witness each nerve-bending moment in total detail!

World renowned stadiums and race tracks enhance the sense of realism – Speedtracks boast superbly realised licensed race courses from around the world, such as Suzuka in Japan, Eastern Creek in Australia and Sachsenring in Germany. Supercross events feature awesome recreations of licensed stadiums and arenas, including Stade de France, Belo Horizonte and Barcelona.

Gamers also have the chance to race additional tracks based around the legendary Trophy course on the Isle of Man and the Motocross tracks of France and the USA.

For the first time ever, gamers have the chance to experience the thrill of stunt trial races where you must hone your skills as you manoeuvre tricky, perilous ramps & jumps. Impress your friends as you perform crazy acrobatic stunts in the fantastic freestyle figure-jumping contest, go bike wild in demanding outdoor dirt tracks, race against the traffic in the middle of a city rush-hour or take part in unique high-speed Dragster races with breathtaking speeds over 500km/h!

Moto Racer World Tour combines the best elements of motor bike racing with challenging, fast and furious fun to deliver the ultimate racing experience. Moto Racer World Tour is the most comprehensive motorcycling simulation available - allowing gamers to experience first hand the trials and tribulations of all forms of motor bike racing.
