

MR DRILLER

London, September 2000 – Sony Computer Entertainment Europe joins forces with Namco to bring the smash Japanese hit, Mr Driller to PAL markets on 2000.

Mr Driller is addictive quirky, frantic puzzle action that is easy to play and impossible to put down. Gamers must avoid falling blocks, pick up air pellets and keep on drilling! Take on the role of Susumu as he drills deeper and deeper into the ground in a quest to save the world and win the coveted title, Mr Driller.

It's a race against time to dig down as far as you can, as fast as possible to gain more points. React quickly to the changing environment for the more tunnels you drill the greater the chance you have of digging to the very bottom of the level, but you must collect enough air to stay alive.

Three highly addictive modes to choose from; learn your trade in Arcade Mode with a choice of 2,500 or 5,000 meters; tunnel as far as you can in a predetermined time frame in Time Attack Mode or test your skills Survival Mode AKA 'drill 'till you drop' - one life to dig as far down into the Earth's core as you possibly can.

Take a deep breath! Learn the unique and intuitive ways that blocks can link together or disappear based on the path you drill. Beware of cave-ins that can occur at any moment as you scramble through the self-created gaps in the blocks and don't get buried alive.

Can you dig it?
