

CHOPPY THE PORK CHOP

This is a game I made for Windows usind Klik and Play. It is entierly freeware. In it you are a pork chop that must fight off evil teeth, mops and hamburgers.

I waould suggest using a 486 for it but it will probably still work on a 386. It supports a soundcard, so if you want to get the most out of this it would suggest you use one.

Unzip it in a diferent directory than the one you want to install it to and run the setup.exe file.
