

TC Swordplay is a game where you block and lunge your sword against the computer's sword. A hit is made on the computer when you are able to maneuver your sword past the computer's sword. Also, a hit is made on you when the computer's sword is able to pass your sword. The trick is to get past the computer's defenses and strike the computer before you get hit. A good strategy is to lunge your sword while changing direction simultaneously.

Movement

Place the arrow at the area you wish to block or lunge at.

Mouse Buttons

Left: Lunge Forward

Objective

Lunge your sword past the computer's sword without letting the computer's sword reach your end first.
