

Technical Note IMERRATA04

Inside Macintosh: Overview Errata

CONTENTS

[Topics](#)[Chapter 1 - Introduction](#)[Chapter 3 - Resources](#)[Chapter 5 - Drawing](#)[References](#)[Downloadables](#)

This Technical Note discusses known errors and omissions in *Inside Macintosh: Overview*.

[Oct 01 1994]

Topics

- Correction to GreetMe Application Code Listing October 1994
- UseResFile Incorrectly Named October 1994
- Correction to List of Reserved Resource Types October 1994
- Correction to QuickDraw Coordinate Plane October 1994

[Back to top](#)

Chapter 1 - Introduction

Correction to **GreetMe** Application Code Listing

Page 3

The call to the `TextFont` function in Listing 1-1 should occur before `StringWidth` is called. In addition, Listing 1-1 should include all the standard initializations, even for managers not explicitly called by the code listing. For example, Listing 1-1 should call `TEInit`.

Chapter 3 - Resources

UseResFile Incorrectly Named

Page 54

The documentation refers to the `SetResFile` routine. The routine should be `UseResFile`.

Correction to List of Reserved Resource Types

Page 55

The documentation states that "Apple reserves for its own use all resource types that include any lowercase letters." This is incorrect. Apple reserves resource types consisting entirely of lowercase letters and special symbols, as well as any other system-defined resource types that already exist. In general, developer-defined resource types should contain at least one uppercase letter.

Chapter 5 - Drawing

Correction to QuickDraw Coordinate Plane

Page 86

The documentation states that the QuickDraw coordinate plane extends from -32767 to 32,767 along the x and y axes. The correct range is -32,768 to 32,767.
