

“BBS in a BOX” Volume IV

Using this CD-ROM for Personal

Use

How do I find my favorite files on this CD-ROM?

At first sight the amount of data on this CD-ROM can seem more than one can easily handle. We have provided several tools so that you can search for your favorite files in a number of ways...

On Location...

I personally enjoy the use of On Location for searching for my files the best. If you do not have On Location, you can purchase it from AMUG by sending \$60.00 to AMUG, On location special offer at 718 E. Campbell Ave., Gilbert, AZ 85234 or calling your favorite mail order house.

With On location you simply type in a portion of the key word you are looking for and the key word will be found either in one of the text databases or on an individual file by On Location. You may then copy the selection to your hard drive for use.

PD PigOut!

This GREAT HyperCard interface for the AMUG CD-ROM can be found in the exclusive folder. HyperCard 2.1 is included for your use. With PD PigOut! you can search the CD-ROM for key words to find the file you want. You may also copy the file to your drive with this stack. PD PigOut! is a commercial product provided by MacWizards.

Text Searches...

Should neither of the two approaches above meet your needs you will find text files containing directories on each section in their appropriate topic folder in the Files folder on the CD-ROM. You can use your favorite word processor or text editor to view these files. You can find the Edit DA in the Get Info:Directory Tools:Text Directory folder if you wish to use it or the allfiles.db text file. This text file is almost 2 megs and contains a listing of all of the files in the files folder.

Compression...

Volume IV contains only two compression types. Files will either be in compactor format or Disk Doubler 3.7 or not compressed at all. The applications to decompress these files are located in the AMUG CD:Files:Unstuffers folder in decompressed format. Use these tools for decompressing any of your files for use.

Remember the CD-ROM is a locked drive so all decompression will need to be done on your hard drive.

Stuff...

There are thousands of files available on this CD-ROM so you will really have to go exploring to find them all. System 7, 7.01 and 6.07 are provided in the Goodies:Apple section along with some great HyperCard stacks. All the Apple Tech Notes are on board, great BBS tools are available in the Goodies Utility folder, Info on AMUG is in the AMUG Folder. Look around and have fun!

Support the Authors!

If you have additional features you would like to see added to “BBS in a BOX”, please feel free to write or call us. We are interested in making the world of public domain and shareware easily understandable to the Macintosh public. Only by supporting these authors and sending in our shareware fees will this type of software distribution continue. No fee is charged for any of the download files provided on this disk. AMUG and MacWizards spend thousands of hours creating the BBS interface on this CD-ROM. Any charge for this CD-ROM is solely to support the BBS interface. Please be sure and pay for any shareware that you use. When we are dishonest with the author he becomes soured on the shareware market and either stops publishing or sells his products commercially .
Thanks again for supporting shareware and Public Domain authors!
