• HELP - Copy selections

Use this dialog to select the Files and Folders that you wish to have automatically copied to the RAMdisk. Using   (Include) on a folder will cause all of its contents to be copied.   You may go "into" a folder and (Exclude)   those files and folders that you do not want copied.

Folder appearance and view attributes are maintained, as are icon placement within the window.

Watch the   (Selected:)   size and compare it against the size RAMdisk you have specified to be sure that the selected items will fit into the RAMdisk.
