

Updating my Hermes System to

.....

“BBS in a BOX” Volume VII

How do I update my Hermes BBS?

Macintosh BBS setups running Hermes BBS systems and “BBS IN A BOX” will find the setup converter in the CD-Setup:Hermes area. You must create Hermes directories with this tool.

The converter processes the ".db" files and creates both files Hermes needs to display the file descriptions. Read the documentation to set this up and be sure and send in your shareware fees!
