You will need to use this application or one of the other SuperCardRunTime versions to convert Black Jack Hot Shot! and NJMUG BBS Navigator!.

About SuperCardRunTime!:
SuperCardRunTime! is an application that will convert SuperCard projects into stand-alone applications. This is a great utility for people who don't own SuperCard and are sick of downloading stand-alone applications and wasting the time it takes them to download around 250k every time they want to download a SuperCard project. This program will let you download the file in project form saving you the 250k extra in downloading time and then convert it to stand-alone form so that you can run it. It requires one SuperCard stand-alone application to run. (SuperCardRunTime.SC is a SuperCard stand-alone application. You can use it if you don't have any other SuperCard stand-alone applications.)

Instructions:
1) Run the program by double-clicking on it from the finder or selecting it and pressing Command Key - O for Open. (You can run it anyway you like, from On-Cue, or any other way that you run programs normally. This is just for users who might be new to the Macintosh.)

2) Now, choose menu item "Save as Application..." from the "File" menu. A file dialog box will come up. Choose a SuperCard stand-alone application such as SuperCardRunTime.SC.

3) Now choose the SuperCard project you want to convert to a stand-alone application. SuperCardRunTime will convert your project and you can now run it without SuperCard!

Good luck,

Adam Stein

I can also be reached on the following electronic services. If you have any comments, questions, or anything else, send me an e-mail message.
Compuserve   : 71140,2051

This is freeware but please register by sending me a note about yourself and how you are using this program. (I'm looking for recommendation letters for college and this would really be a great help. Thanks.)

Include your address and electronic addresses so that I can contact you about future products.

Thanks again,
Adam Stein
