LaserWriter Utility Q&As
Imaging M.IM.LWUtil.Q&As

Revised by: Developer Support Center   October 1992
Written by: Developer Support Center   October 1990

This Technical Note contains a collection of Q&As relating to a specific topic—questions you've sent the Developer Support Center (DSC) along with answers from the DSC engineers. While DSC engineers have checked the Q&A content for accuracy, the Q&A Technical Notes don't have the editing and organization of other Technical Notes. The Q&A function is to get new technical information and updates to you quickly, saving the polish for when the information migrates into reference manuals.

Q&As are now included with Technical Notes to make access to technical updates easier for you. If you have comments or suggestions about Q&A content or distribution, please let us know by sending an AppleLink to DEVFEEDBACK. Apple Partners may send technical questions about Q&A content to DEVSUPPORT for resolution.

New Q&As and Q&As revised this month are marked with a bar in the side margin.

SCSI drive format for LaserWriter II NTX with Rev. 3 ROMs
Written: 5/3/91
Last reviewed: 6/26/91

What could be causing intermittent PostScript errors from a LaserWriter II NTX with an SCSI hard disk mounted after installing the Rev 3 ROM upgrade?

___

The LaserWriter II NTX with Rev 3 ROMs does not work properly with a hard disk formatted with the LaserWriter Font Utility 1.x. You need to reformat the disk and copy the fonts back onto the hard disk using the LaserWriter Font Utility 2.0.2. Unfortunately, there is no way to make this procedure easier.

LaserWriter Font Utility copies Postscript file to printer
Written: 9/23/91
Last reviewed: 10/8/91

Is there a utility that will send a PostScript file from disk to the LaserWriter?

___

The LaserWriter Font Utility handles this job and is part of the System 7 disk set. On the System 7 Golden Master CD, the path is System 7.0: System Software 7.0: Installer Version: Tidbits folder.
