

## Helpful Hints

### Use the Shift Key to Select

In general, you make a selection by holding down the shift key and moving through the parts of the movie you want to select.

### Getting Rid of the Selection

To get rid of the selection so that no part of the movie is selected, click in the play bar away from the thumb.

### Playing the Selection

You may preview the movie's current selection by choosing "Play In Selection" in the Movie menu. When you start the movie, only the selection will be played.
