As you can see, you click on the Item that you want to change, and the Control Panel shows the controls for that item. You can also see the version number in the lower left hand corner. Don't expect the finished version to look like this. We'll have a little wait until this pup is finished.

The Finder (Version 5.4A4) also sports some new items... (See Below) It shows the influence of Servant as well. The new Finder will display the startup screen as a desktop background (if you so desire). There are changes in the File menu as well. The File menu is pretty standard until you hit "Get Preferences" It is disabled so I have to speculate as to it's use... It could be used for Password protection for files, or perhaps as a way from the finder to modify the Finders own "LAYO" Resource. There are other changes as well.

The **GetInfo** command also sports a new window. All of the text is displayed Geneva 9 as opposed to C

The sample you see of the newsletter above, runs 13 pages of fact filled information including reviews, rumors, things we would like to see for the Mac, Graphic tips and more.

We feel that we are Chicago's number #1 MAC board, and are working on becoming the best MAC board in the US. We have 20 megs of PD software with another 20 megs scheduled to go on-line within three months. We even show PC Pursuit users how to speed up their downloads. We tell you how to find out information about correcting it.

This newsletter is free of charge just like our board. So, give us a call 24-hrs a day (but, remember that we are having flooding problems and lightning storms in Chicago right now, so if you don't get an answer please try again.

One last point, if you decide to call, you may want to use Red Ryder 9.2 or higher because we also have an on-line graphics demo available.
