

GAMER Project - BBS Account Application

Bob Nordling
15 Everglades St.
Kenner, LA 70065

Dear GAMER Project Member/Shareware Author,

The GAMER Project BBS has been online since July 1, 1991. Our BBS software is TeleFinder™ which provides us with a complete Macintosh interface. For example, downloading a file is as easy as dragging a file to your hard drive icon. Messages are entered and edited with a Mac-like text processor. This is the friendliest BBS software on the market. However to access the BBS, a special terminal program called TeleFinder™/User is necessary. There are 2 ways you can get this software:

1) Call the BBS, and at the prompt, you will be given a choice between logging on or downloading the user software. Choose to download the user software (which comes complete with docs). Download time is 4 minutes using a v.32 (9600 bps) modem, 16 minutes using a 2400 bps modem, and 32 minutes using a 1200 bps modem.

2) Send \$1.00 to: GAMER Project BBS, 15 Everglades St., Kenner, LA 70065. I will rush to you the terminal program, the TeleFinder™/User docs, and some additional docs with information about navigating the BBS.

The phone number of the GAMER Project BBS is: 1-504-467-0574. If the traffic on the board becomes heavy enough, we will add a second incoming line. Our modem is a Telebit T-2500 supporting 300/1200/2400, v.32 9600bps, and PEP 18031 bps. Soon we will have support for v.42/v.42bis, but for now we have MNP 1-5 support.

After procuring the TeleFinder™/User terminal program, you will need to configure it by putting in your user NAME (indicated below) and your PASSWORD (indicated below). After you select your modem type, you will then be ready to call the board (TeleFinder™/User will handle the entire logon procedure). The GAMER Project BBS features AMUG's "BBS in a Box" online, so callers will be able to choose from nearly 8,500 files to download from that source. But there is also a hard drive online which contains files from the GAMER Project's library, the largest known collection of Mac shareware entertainment & educational software in the world.
