

Gary:

Am hoping you will be able to piece this whole thing together okay.

I'm sending three pictures of a house which show Scanman's capability. These come to you unsized...you'll need to reduce them to fit in the column and maybe crop them some. I had them lined up in a row in the second column where indicated in the text. I think important to have them all together so the differences show clearly.

The other pictures are pretty self explanatory as to placement,etc. I hope they come to you okay.

I think everything else should fall into place but if not, give me or Lea a call at 838 4036.

Mike Bromley
