1.8 Description

Description

Icon is a Custom Class of the Magic User Interface © by Stefan Stuntz. It's a subclass of area-class.

MUI public custom class which allows use of an icon's render and select images for display in a gadget. Depending on the gadget's select state the appropriate image will be displayed.

1.9 Requirements

Requirements

- MUI >= 3.2 (Version 12)

1.10 Installation

Installation

Use the installer script!

(The Installer must be in your system-path!)

1.11 History

History

08.08.1996 - (v1.0) First release on Aminet

04.09.1996 - (v1.1) Added MUIA_Version and MUIA_Revision

Fixed docs to reflect proper acknowledgement of

original documentation - sorry Kai :-(

1.12 Todo

Todo

- Method to retrieve icon tooltypes

Known problems

- If no select render image exists in a specified icon then the selected image will be the same as the unselected image.

1.14   Acknowledgments

Stefan Stuntz : for the Magic User Interface

Klaus Melchior : for the MUI custom class support

Kai Hofmann : for the original documentation from which this guide and autodoc were created

1.15   MUI

This is a custom class of the

MUI - MagicUserInterface

(c) Copyright 1993/94 by Stefan Stuntz

MUI is a system to generate and maintain graphical user interfaces. With

the aid of a preferences program, the user of an application has the

ability to customize the outfit according to his personal taste.

MUI is distributed as shareware. To obtain a complete package containing

lots of examples and more information about registration please look for

a file called "muiXXusr.lha" (XX means the latest version number) on

your local bulletin boards or on public domain disks.

If you want to register directly, feel free to send

DM 30.- or US$ 20.-

to
