1.2 Preface

```
Preface
~~~~~
```

```
Since a few months, I use several startup-sequences, shell-startups and user- ↵
startups
for a better use of my Amiga. For example, if I need a lot of memory or if I want ↵
to
speed up my Amiga boot, ..., I change my startup-sequence file. With differents ↵
user-startups,
I can vary the number of assigns. Shell-startups provide me several programming
environments (C, E or Java). That's why I've began to number all these files
(startup_sequence1, startup_sequence2, ...) and rename it in startup-sequence,
user-startup and shell-startup when i want to use it ... I looked for a software
which can manage all the startup files but I didn't found any one :( So I took my ↵
courage
in both hands and decided to program my own utility : StartMeUp was born on
```

January 2000.

StartMeUp is E-mailware ; if you like it and often use it, send-me an email at ↔  
the address :

boing.attitude@online.fr

Please write your name, firstname and type of Amiga you have (processor, OS, ↔  
...).

StartMeUp can be included in any spreadings (CDROM, net, ...)

Sources and manual are protected by Intellectual property.  
You can't modify it without written permission of Jérôme SENAY.

You use Start Me Up at your own risc.

## 1.4 Author

Author

~~~~~

Jérôme SENAY (i.e Glames)

- Nationality :
 - . France
 - Training :
 - . Computer Science master's degree
 - Job :
 - . System analyst
 - Known programming languages :
 - . VP
 - . C (Amiga, PC et AS/400)
 - . JAVA (1.1.6 et 1.2.2)
 - . Amos Pro (2.0)
 - . Visual Basic (3.0 et 5.0)
 - . RPG (3.0 et 4.0)
 - . Pascal
 - . Ada
 - . C++
 - . Assembler 68000
 - . Estel
-

- . Cobol
- . HTML 4.0
- . XML 1.0

and soon : Blitz Basic, E, PHP. Perl

1.5 Technical Informations

Technical informations

~~~~~

- StartMeUp 1.3 was developed in C (StormC 3.0) on an A1200 030 18 Mo (OS 3.9) ←  
.
- Programing..... Glames
- Drawing..... Pounard
- Tests..... Pounard (pounard@altern.org),  
Patryk Dâbrowski (patppc@polbox.com),  
Guy Maysonnave (guy.maysonnave@freesbee.fr),  
Olivier Schott (oschott@club-internet.fr),  
et Glames
- Manual..... Glames
- Translating..... french and english : Glames  
polish : Patryk Dâbrowski  
deutsch : Christian Haldenwang (chal@club-internet.fr)
- You need Workbench 3.5 or 3.9 to run StartMeUp V1.3 (it uses Reaction).
- StartMeUp was tested on :
  - . A1200 68030 50Mhz 18 Mo AmigaOS 3.9
  - . A1200 68040 40Mhz Cybervision3D 32 Mo AmigaOS 3.9
  - . A1200 PPC 160/040 Mediator Voodoo 3 AmigaOS 3.9

## 1.6 Installation

Installation

~~~~~

- Create a directory "StartMeUp" and copy all files of StartMeUpV1_3.lha in it ←
.

1.7 New features

New features

~~~~~

- Debugging :
  - . Crash if you choose a name containing blanks (spaces).
  - . Wrong items on combo list "File's type" after screen "Options".
  - . Buttons not visible on window "Reboot" on CGX systems.
  - . Window display refresh when you choose another language.

- Features :
  - . New GUI (based on Wb 3.5 REACTION system)
  - . You can link a comment to startup files.
  - . Workbench 3.9 compatibility.
  - . Window sizeable, moveable and automatically center
  - . Reboot, without Reaction enabled, is now possible :)
  - . Click on icon "Start Me Up" to see informations about the author.
  - . Start Me Up is now useable in deutsch.
  - . You can see startup files'text.

## 1.8 Use

Use

~~~

Firstable, create all your startup-sequences, user-startups and shell-startups.

1/ Startup files addition

=====

- Choose startup file's type you want (startup-sequence, user-startup or ↵ shell-startup).
by clicking on combo button placed under startup files' list.
- Then click on button "Add".
- Choose a file (thanks to button "Browse" or keyboard) and eventually a ↵ comment. Click on button "OK". Startup file (and eventually his comment) are now in the list.

Note : You can't choose "S:startup-sequence", "S:user-startup" and "S:Shell- ↵ startup".

Comment is not needed.

2/ Startup files removal

=====

- Click on a file of the list.
- Then click on button "Remove".

3/ Startup files choice

=====

- Click on a file of the list.
- Click on button "OK".
- If reboot mode is enabled, Amiga will reboot ... If security mode is ↵ enabled, a window will appear and you should confirm Amiga reboot.

Notes : . You can simultaneously choose a startup file for each type.

- . Be careful : some startup-sequences don't enable Reaction. In this ↵ case, you can only select a startup-sequence file (in a list).

4/ Startup files show

=====

- Click on a file of the list.
- Click on button "Show".

5/ About Author

=====

- Click on icon "Start Me Up".

6/ Preferences modification

=====

- Click on button "Options"
- After have choosing preferences, click on "Ok" to use it.

Notes :

- . Three languages are available : english, french and polish.
- . "Reboot" mode makes your Amiga reboots when you quit StartMeUp.
- . "Security" mode makes a confirm window appears before Amiga reboot.

7/ Quit

=====

- Click on button "Cancel".

- Jérôme Senay i.e. Glames : programming, drawing, test

### Products

~~~~~

- Deluxe Proj V1.0

....."

- What ? Works management utility.
- Who ? For these who want to be organized.
- With ? All Amiga.
- When ? Not available at the moment (program source losing).

- Deluxe Map V2.1

....."

- What ? Levels and backgrounds editor.
- Who ? For AMOS programmers.
- With ? All amiga.
- when ? Available.

- StartMeUp V1.1

.....

- What ? Startup files management utility.
- Who ? For all.
- With ? All amiga.
- When ? Available.

- StartMeUp V1.3

.....

- What ? Startup files management utility.
- Who ? For all.
- With ? amiga with AmigaOS 3.5.
- When ? Available.

- Untar V1.11

.....»

What ? Tar files extract utility.
Who ? For all.
with ? All amiga.
When ? Available.
