

When you click on the 'Save & Exit' button, high resolution TIFF files of the images highlighted will be saved to your computer.

Click on any image to add or subtract from your selection. This can also be done by returning to the Preview Image Pages, selecting an image, and editing your selection from the full screen view.

When you are satisfied with your selection, click on the 'Save & Exit' button. You will then be shown the number of images you have selected and the amount of storage space required on your computer. You will then be asked to select the location where the high resolution files will be saved on your computer. The default location is your desktop.

After selecting the location for the images, they will be saved to your computer, and the program will begin it's exit sequence.
