                    The AMIGA MUI Classes Guide

V1.2.3   Release: 45   Date: Germany, Berlin, 26.03.2000

376 known classes / 3 faked classes

_____ ←

Based on an idea by Heiko Schröder
Author of LibsGuide, DevsGuide and DTypesGuide.
_____ ←

                        First steps:

      First: Heiko Schröder creates LibsGuide, DevsGuide and   DTypesGuide.

_____

```
      Second:   Stuart Kelly     creates ClassesGuide
1.0  15.04.99:  Michaela Prüß    begin the MUIClassesGuide
1.1  21.11.99:  Add Fake 4.0     begin an chapter for dangerous classes
1.2  09.03.00:  Michaela Prüß    first use VersCheck V3
```

Words about this Guide

This guide is an informationsystem. You find information about the latest known
versions and the authors of the classes. You also find, if I know, important or
additional informations to the classes. But you find nothing about contents, use
or installing of them. See also the MUI and MCC documents!

MUI is shareware, most of the MCC-Lib's are freeware, but not all of them! You
should lock in the documents for copyright's and freeware, shareware or other
informations about use and permissions. This guide will only give a overview
about newest and/or existing versions.

    Your input for this guide

_____ ↩

This guide is completly created GuidEd, written and copyright by Linus McCabe, a
MUI based AmigaGuide editor. Take a look for it in the Aminet.

The version compare uses VersCheck, a freeware program, written by myself. You ↩
    find latest version on my homepage or in the Aminet.

```

_____

MUI is an object oriented system to create and maintain graphical user
interfaces. From a programmers point of view, using MUI saves a lot of
time and makes life much easier. Thinking about complicated terms like
window resizing or font sensitivity is simply not neccesary.

On the other hand, users of MUI based applications have the ability to
customize nearly every pixel of a programs interface according to their
personal taste.

Please click on the Install-MUI icon to install MUI on your system or to
update from previous versions. Latest news and support can be found on
Internet at www.sasg.com.

                            ****

                             Attention

    If you're still not registered for MUI, check the new and unique
   shareware lottery and great discounts at www.sasg.com. Give it a try!

1.4 Update a MCC Class

```
Update a MCC-Class

1.] at the offizial MUI homepage:

        http://www.sasg.com
```

2.] by a great onlineprojekt, the TUMULT pages. A unofficail list of
    MUI-Classes can be find and also link to all known update sides.

          http://www.amiga.dk/tumult

3.]] Most MUI/MCC-Classes will also be fount on the Aminet in the latest
    versions. Take a look to

          http://de.aminet.net

Authors:

In the documents of the classes are a lot of email-adresses, adresses and
home-pages found.
But, because I don't know how actual they are and if the author's give
me permissions to include this date's in this guide I only including the
offizial MUI-page. Other homepage's will be placed here if the author's
want so.

There are also links to the most download pages. Look on this
page for updates and also in the great AmiNet!

1.5   Fakes, Trojans and other warnings

MUI 4.0 - a fake and more

  After I heared from it, I searched for it, and found it. The MUI40USR.lha
  exists. But it is no new version, it is a faked MUI38USR.lha witj lots
  of changes. If you look inside this chapter because you search informations,
  then reat it. If VersCheck show you a warning that it one ore more parts of
  your system found, jump to the end of this text, you find all faked files!

  Changes between the real MUI3.8 and the faked MUI4.0:

  This all aare patches, replacement with trojan or anything in this case.

   * Deleting all below listed MUI programs, library's, from list below.

   * install MUI from a secret place (CP, SASG homepage, AmiNet (server/cd)
     again.

   * testing system by a anti virus tool! Ny test show that VT is the only
     program that find the faket MUI, but only 3 from 15)

  What do the faake doing:

This text says whaat I believe and think, afer analyse the files aand read
the fact from VT's warning.

  * From changed Install-MUI a program is startet, that will replace a Shell
    script in the MUI goodies dir. No anti-virus programmer, crypter or
    anything else has seen it decryptet. It is a secret, what goes on if it
    start.

  * Two things, that simple to find (and shure not the kern functions):

  --- Why it isn't an apriljoke ---

    The package has the date 01-APRIL-1999. It SEEM to be a april joke
  . Messages in MUI und PSI say it also. But, there are files that are
    dated to 02-april-99 Nobody make such a big april joke and comes one
    day to late.This is BULLSHIT!

  --- What do it really??? -------

    The patches includen a part, that give a hint. All seem to be a email
    function, sending a email to Stefan Stunz with more than unfine content.
    I think, this part is real, but not 100 % correct.

    But when this mails really be send, mail will never reach SASG. If
    anyone has a closed network, he can check it out. I think, the mail go
    not to SASG. The mail go to the autor invisible packed in the big
    shot part..
    And the mail brings more as the visible text. Possible for such a
    subpack is aany file. Perhapy it get your passwords und accounts (if
    yo, the pack is 100 % to for BBS systems.

    Or, the will be searching for licence files, config, keyfiles, and
    yo on. I have no change to start such a software, because it can be
    dangerous for the security of my software and harddisks. If I hear
    more, it will pot also in my guide.

  * Likely, if you have the software running and all things woring. Why not,
    it is really MUI 3.8, copied and with a little add ons.

  * I don't know what happens if a part of the software is running or startet
    and date is first april anyyear.

    ##
    ### what's real, what's faked, how find the faked files? ###
    ##

    Changed mui classes, list created using VersCheck:
    ^^

    First list: .mui classes (3)

Volumelist.mui   6824 ---rwed 01-Apr-99 21:41:18 exe
  Volumelist.mui |21.8 | (12.02.97) ©1992-1997 Stefan Stuntz"

Virtgroup.mui   7864 ---rwed 01-Apr-99 21:41:22 exe

```
    Virtgroup.mui                      |21.10     | (12.02.97) ©1992-1997 Stefan Stuntz"
------------------------------------------------------------------------
Aboutmui.mui                          14212 ---rwed 01-Apr-99  21:37:56 exe
  Aboutmui.mui                        |21.8   | (12.02.97) ©1992-1997 Stefan Stuntz"
------------------------------------------------------------------------

     Second list: .classes (only date/version patched to
     work together with the MUI classes that changed

------------------------------------------------------------------------
muiwinscroller.class                  2864 ---rwed 01-Apr-99  21:37:30 exe
  muiwinscroller.class                |21.9   | (12.02.97) ©1992-1997 Stefan Stuntz"
------------------------------------------------------------------------
muiwinborder.class                    4428 ---rwed 01-Apr-99  21:37:24 exe
  muiwinborder.class                  |21.9   | (12.02.97) ©1992-1997 Stefan Stuntz"
------------------------------------------------------------------------
muipropg.class                        4572 ---rwed 01-Apr-99  21:36:54 exe
  muipropg.class                      |21.9   | (12.02.97) ©1992-1997 Stefan Stuntz"
------------------------------------------------------------------------

     Third list: the changed library's. The version is also
     changed to work as one system. Other paths are not to found.

------------------------------------------------------------------------
muispecial.library                    3056 ---rwed 01-Apr-99  21:37:16 exe
  muispecial.library                  |21.11    | (12.02.97) ©1992-1997 Stefan Stuntz"
------------------------------------------------------------------------

```

     Lock at the end of the programs to see ths the "April"
     message. cmp found more inserts at beginnen and so I can't
     not say, whow much is really changed.

Changes programs   MUI 7536   01-Apr-99 V 21.14
                            PSI 32916   01-Apr-99 V 21.8

           Install-MUI.info 1904   02-Apr-99
           Install-MUI   27034   01-Apr-99 V 4.0   TROJAN WILL
goodies/   <------\START/
           ClickForColors   1340   01-Apr-99

So, that is an important action. Install-MUI start the MWB-Script
ClickForColors, everybody know it (und normal it isn't startet).
But the colorbatch is only 100 or 200 bytes. It is replaced by a
crypt/packt bin file. and this is runable und startet if you instakk.

What happens here, no idea...

1.7   Register a Library

_____

Register new library's

If you found a new version or write an own library and want it to include in this ←
    Guide, please send an email to:

Gateway5@gmx.net

I include the information in the next release.

If you have informations about authors, dates or informations that are not ←
    included yet, please send this also!

1.8   Wanted MUI Author

WANTED: MUI-Author

I created this Guide, because the informations are not included in the existing ←
    Guide in the moment and the work on them are much enough work for the authors.

But, I programming without use of MUI and I think the programmers of the MUI ←
    classes have most the newest and best informations, better than my.

So I think this work can better done by any of this people. If you programming ←
    with MUI and want to do this work in future, please contact me to do so.

For the time no insider do so, I do the work.
