

## Searching Movies and Stars

Clicking this icon will allow you to search for your favorite Movie or Star. It will also allow for complex searches!

Imagine.... have you ever wanted to find every Movie your two favorite Stars were in? Or maybe you want to find every Movie by The Dark Brothers or Rinse Dream? What about that Fetish!?

The Search Dialog is very simple to use. It consists of several different components.

Pull Down Menus - Each pull down menu contains everything needed to search the Almanac.

The first is the logic selection (If, And, Or). The first line in the search list is always If. Afterwards, the logic is either And or Or. This allows for complex searches.

The second menu is categories. Each corresponds to a field in the Movies or the Stars. Select one of these fields to search.

The third pull down is the search comparison. This list will change depending on the selected category.

The last section is either a text entry field or another pull down menu with more options. In the case of Rating, Heat, or Fetish, a pull down menu will offer choices. Otherwise, text is entered.

## Buttons

The Delete Button deletes a search criteria line.

The Cancel Button will cancel the search.

The Search All Button is the default when first searching.

The Search Button will perform the search

## Let's try it!

The easiest way to search is to simply start typing. The menus will automatically fill in. The default is searching for a Title.

ulling down any of the menus will show all searching possibilities. As an example, to search for your favorite fetish select the category, the searching comparison, and then the fetish.

ow let's get complex, shall we? Not only do we want to find a Movie with a Big Tit fetish... we want Sex Toys! Select the next line...

e now have another line to add more search criteria. First we select how to add this to our search...

ow our category...

nd finally the Fetish!
