

SYSTEM TRAY CLEANER (STC) AGREEMENT

System Tray Cleaner is an online tool which helps you manage the icons in your system tray.

The problem is that for some system tray icons it is very hard to find out what they do, which program installed them or whether it can be safely disabled. To solve this problem, System Tray Cleaner uses a web site to analyze and give you up to date information and stats about each system tray icon.

System Tray Cleaner will also provide online user comments about each icon and program.

In order to accomplish this, System Tray Cleaner gathers information about the icons that reside in your system tray and transmits it to the System Tray Cleaner web site, where it is analyzed and shown to you in your web browser, together with up to date information about each icon. It is necessary to do that in order for you to benefit from the up to date information about each program, which is stored and updated continuously on our online server.

By accepting this agreement, you allow System Tray Cleaner to transmit to our web site information about which icons are located in your system tray. System Tray Cleaner will **NEVER** upload or transmit on the Internet any personal or private information.

System Tray Cleaner does **NOT** contain any spyware or virus. System Tray Cleaner has been certified by Softpedia as "100% Clean" and by CNet Download.com as "Tested spyware free".

If you don't accept this agreement, the information about your system tray icons will NOT be uploaded to our web site, but you will not be able to manage your system tray icons using System Tray Cleaner.
