Polyomino 2.1 (bilingual version: english and french)

Requires: 3442, 4MB RAM, Win95

One-line description: Solve 100 puzzles with deluxe pentaminoes.

Description: Polyomino is a collection of 100 puzzles in which the objective is to fill entirely the grid of the puzzle with the adequate pentaminoes. These ones have been designed with great care. Indeed they now have a 3D effect wholly parametrable (colors, width, direction...). In addition you can rotate or turn them with right mouse clicks. There exists puzzles for beginners or experts. Moreover, there are many options, informations on the game and a fun animation when the puzzle is solved. The game interface and the help file can be displayed in English or French.
Shareware, \$9 (or Full pack: \$19).

Keywords: Shareware, Pentaminoes, Reflexion game, Puzzles.

Electronic distribution: Placing of this program on BBS, online services, the internet and the like is encouraged, as long as all files (POLYOMINO.EXE, POLYFRS.HLP, POLYANG.HLP, REGISTER.EXE, REGISTER.HLP, FILE_ID.DIZ, README.TXT, VENDOR.DOC, PICK.WAV, PUT.WAV, PLACE.WAV, ROTATION.WAV, REMOVE.WAV, FANFARE.WAV and LICENSE.TXT) are present and unmodified. The files should be packed into a single file with a popular file archiving and compression program. The file should be called POLY210s.xxx where the 210 indicates version 2.1, and xxx is the normal file extension associated with the compression program used.
