Pairs Instructions

Introduction

Pairs is an addictive memory game. Use your powers of memory and concentration to complete the game in as few moves as possible!

How to.....

[Play Pairs](#)
[Register Pairs](#)

Playing Pairs

The aim of the game is to uncover all the squares in the playing area by clicking them and finding matching pairs of symbols.

If, after clicking two successive squares, you find a match, that pair will stay on the board. If you don't find a match, the squares are re-covered, but remember what you saw and where you saw it........

Completing Pairs

The game is over when all the symbols on the game board have been uncovered. If you have beaten one of the previous high scores, you will be asked to enter your name.

Registration

Pairs is free! However, if you like it, please write to me via e-mail and let me know!
