

## On-line Help

This help window is available anytime:

- 1) a modal dialog is not displayed, and
- 2) the 'File Buddy Help' file is in the same folder as your copy of File Buddy, and
- 3) its name has not been changed.

Clicking underlined text takes you to that topic. To back to the previously viewed topic, use the Go Back button:

Individual topics can be saved to disk as a SimpleText file using the Save To File button: Graphics are lost, but styles are preserved when viewed in SimpleText. If viewed in TeachText, the styles are ignored. Each topic is saved as a separate file because a single SimpleText document cannot contain all of the data in the on-line help.
