

HOW TO INSTALL MLP FROM CD-ROM SUCCESSFULLY

- A Locate a hard drive with atleast 10Mb of disk space.
- B Load the MLP CD-ROM and drag the "MLPro" folder to the hard drive you previously found enough space on.
- C Simply drag the ' MLPPro' folder to your hard disk.

And that's it...

SAVING DISK SPACE

Leave the 'CD Templates' folder on the MLP CD-ROM.

MEDIA CHANGE TO MLP

This new version of MLP ships on 'CD-ROM' only. Floppy Disks versions are no longer available due to file size restrictions.

SORRY

It's extremely difficult to support more than one version of any program. I still support registered users of earlier versions. However, earlier versions of Music Library are no longer available to purchase.

INSTALLATION HELP

- Use the file called "MLPro StartUp" to load MLP.
(If you are short on memory run the individual module required).
- All MLP's modules must be reside in the same folder
(except the 'CD Templates' folder).
- Always copy the entire folder to your hard disk.
- Do NOT rename the MLP folder or associated file/s.
- Always keep the original MLP 'CD-ROM' in a safe place and away from direct sunlight or extreme temperatures.
- Technical support is FREE to registered users.
- Constructive suggestions are always welcome from registered users.
