

AST MINUTE CHANGES TO MLP

There have been quite a few changes since MLP last appeared on the cover disc of [MacFormat](#). Below is a brief overview of these changes:-

- Supports the PressIT™ CD labelling applicator from Rocky Mountain Traders.
- Includes [5] sample CD 'Picture' and [6] CD 'Textured' label templates.
- The 'Watermark' has been removed from all printed reports.
- Improved the 'FIND' scripts plus a new 'Find Record' screen has been added to simplify finding your records.
- Updated 'View By' scripts in MLP^{ro} for finding 'Classical', 'Compilations' and 'Popular Music' recordings.
- Finding 'Lyrics' has been improved by updating the existing script.
- New module 'Floppy Disk Labeller' has been added to the suite of existing MLP modules. This module supports two different label sizes.
- Added new scripts to find all 'Loaned Out' and 'Sold To' records in the following modules:-
 - Compact Disc Labeller
 - Cartridge Labeller
 - Floppy Disk Labeller.
- The 'Cartridge Labeller' printed data report now shows the individual cost values by cartridge type.
- The 'Data Entry' icon has been added to all Print selection entry screens. This allows the user to quickly go back and edit any fields previously missed or left blank.
- Most of the larger 'Note' fields now include the 'ruffled paper' background.
- Major fields like 'Computer Title', 'Artist' and 'Recording Title' have now been colour coded so the fields can be recognised quickly.
- 'Ticket Cost' now calculates the cost for each persons ticket - ideal for fan clubs and organisations involved in planning group outings.

- Simplified the 'Registered To' panel on printed reports - uses less ink and prints reports faster than previous version.
