

Project Magellan

About This Installer

This Installer will install the game folder on the volume of your choice. Feel free to move this folder anywhere you wish after installation.

System Requirements

You can use the Installer and the software it installs on Macintosh computers operating with System 7.5.3 and later, Color QuickDraw, at least 16megs of RAM and 5 megs of HD space.

More on Installation

Some virus-protection programs (GateKeeper, SAM, Virex, etc.) may warn you about some of the operations the installer performs. This is normal and you should always give the installer permission to perform the requested operations. You may find it easier to disable any virus-protection programs before running the installer.
