

File Buddy™ 5.2

Copyright 1994-99, Laurence Harris

What this Installer Installs:

Application

The Easy Install installs the version (680x0 or PowerPC) optimized for your computer. To force 68K, PowerPC native, or fat binary installations, use the Custom Install option available later in this installer.

File Buddy CP - A control panel for using File Buddy as the default find file application. (PowerPC only)

If your system software supports contextual menus:

Open in File Buddy - A contextual menu plug-in for users of MacOS 8.0 or later, installed in the Contextual Menu Items folder.

File Buddy CM - Another contextual menu plug-in, installed in a Contextual Menu Plug-Ins folder in the File Buddy folder.

Important Things to Read - A folder containing a Read Me file (including version history); the 'Purchasing/Upgrading FB' file; the 'Read These FAQs' file; the 'FileBuddy5ReadMe.html' file for viewing in your web browser; and the 'MacOS 8.6 and Online Help' file.

File Buddy Support folder - The HTML help files, folder templates, and plug-ins.

Documentation

File Buddy™ 5 Read Me - An expanded version of what you are reading now, with contact information, and the usual Read Me stuff, and an HTML file containing the same information.

Purchasing/Upgrading FB - Complete purchasing and upgrade information.

Read These FAQs - Frequently asked questions about File Buddy.

Viewing the Online Help - Instructions for using the new HTML-based online help with versions of the Mac OS prior to 8.5.

Bookmark Files - Bookmark files for Navigator and Internet Explorer for the Kagi payment page for File Buddy.

Compatibility with Mac OS 8, 8.1, 8.5, and 8.6

File Buddy 5.2 was primarily developed and tested using MacOS 8.5 and 8.6. It has also been tested to a more limited extent with MacOS 8.1 and System 7.6.1. There are currently no known compatibility issues with MacOS 8.5 and only one with 8.6 involving the online help. Users of MacOS 8.6 should read the file 'MacOS 8.6 and Online Help'.

Read the Known Problems section in the installed Read Me for a description of some minor issues in MacOS 8.1 and earlier releases of the system software.

Changes and Fixes in 5.2 - June 13, 1999

Changes

Two contextual menu plug-ins have been added to the File Buddy install. 'Open in File Buddy' will open the current Finder selection in File Buddy as if the items were dropped on File Buddy. 'File Buddy CM' adds a File Buddy submenu with multiple commands to your contextual menus.

A 'File Buddy CP' control panel has been added to the install. It lets you open the Find window with Command-F, or whatever key you set in the control panel.

Finding duplicates requires less time.

The Make Alias window is no longer modal.

Controls (buttons, pop-up menus, and such) now enable when a window is active and disable when a window is

inactive. This was not done in earlier releases because of the time required on slower computers to change the state of a large number of controls in windows such as the Info and Find windows. The speed issue is now outweighed by the desire for the correct behavior.

Fixes

Fixed a problem that would cause File Buddy to crash if the system folder was on a locked volume such as a CD.

Fixed a problem creating text versions of snapshot files which could cause some paths to be incomplete.

Some items in the Rename window were not being hidden initially if the last operation was anything other than Replace. Fixed.

Trying to open or reveal invisible items from a file list produces an alert asking if you wish to make them visible first. They were not being made visible, so whatever you were trying to do wouldn't work if it required the item to be visible. Fixed.

Identified and fixed some very small memory leaks that were introduced in earliest releases of version 4.

A few minor bug fixes.

Disclaimer:

Every effort has been made to insure File Buddy is as reliable and stable as possible. Nevertheless, as with all software, you use File Buddy entirely at your own risk.

Please send any information concerning bugs, unexpected behaviors, or suggestions to one of the e-mail addresses below.

Sincerely,

Laurence Harris
