

About This Update

This program will update the firmware in your ^0 to ^1.

Instructions

Before updating your modem, make sure that the update process will not be disturbed for any reason. To avoid disruptions, which can damage the modem's firmware, disable screen savers or other software that may interrupt the update process. During the update process, do not turn off your computer or modem.

To update the modem's firmware, click the Update Modem button below.
