Weather

Making a Weather Enquiry

The Tel-Me Weather input area is arranged as follows:

Forecast	🏴 UK	±			Send
Period	Today	±			Clear
Report Type	Full	±	Ref		

Click on the required item for more information.

The actions required to make an enquiry are as follows:
1. Select the required Forecast area.
2. Select the required forecast Period. The options in this field will vary according to the Forecast area selection.
3. For UK forecasts, select the required Report Type.
4. Click on the Send button to begin the enquiry.

Once the enquiry is made, a corresponding entry is added to the top of the library using either the selected Forecast Area or the Reference (if one was entered) as the heading.

Forecast Area

The following forecast areas are selectable using this field:

UK

UK Regions   London & South East England
South West England
East Anglia & Lincolnshire
The Midlands
North West England
North East England
Wales
North & North East Scotland
Central & Southern Scotland
Northern Ireland

Europe
European Cities
European Resorts
UK Historical   Provides weather records for up to the preceding 30 days.

Return to Previous ◀

Period

The forecast periods offered by this field depend upon the selected Forecast area, as follows:

UK   Today, 3 day & 30 day
UK Regions   3 day
Europe   Today
European Cities   3 day
European Resorts   3 day
UK Historical   Weather records for the preceding 30 days are individually selectable.

Report Type

For all Forecast Area options except UK, this field provides the single option of Full.

For UK Today and 3 day forecasts, a Quick option is made available due to the comprehensive detail that full UK forecasts contain. The two options differ as follows:

- UK Full Reports consist of four frames (Morning, Afternoon, Evening and Night) per day of each of four information types (standard weather symbols, temperature gradients, synoptic charts and radar displays). In other words, UK Full Today reports have 16 frames and UK Full 3 day reports have 48 frames in total).
- UK Quick Reports contain only four standard weather symbol charts for each day.

Send

Initiates an enquiry using the entered information.

Clear

Returns the input fields to their default settings.

Ref

An optional field for entering a reference for the enquiry. The characters entered here will be used as the heading for the enquiry within the library. If no reference is entered, one will be generated automatically.
