

What is British Rail Planner?

Tel-Me British Rail Planner helps you to find the most suitable rail journey to match your specified departure or arrival time. For each journey enquiry, up to three possible alternative routes are suggested so that you can choose the most appropriate one. For each stage of every suggested journey, the following information is also provided:

- Arrival and departure times
- Duration
- Type of train
- Catering facilities on the train
- Seat booking availability
- First and second class seating availability
- The operator (e.g. Regional Railways, Network South East)

Using the information gained you contact a sales agent to establish journey price and reserve seats.

The services displayed are based on the services that are intended to be run at the times requested and take account of planned engineering work. You should be aware that services may be altered at any time without notice and no liability can be accepted for inaccuracy of the information displayed.
