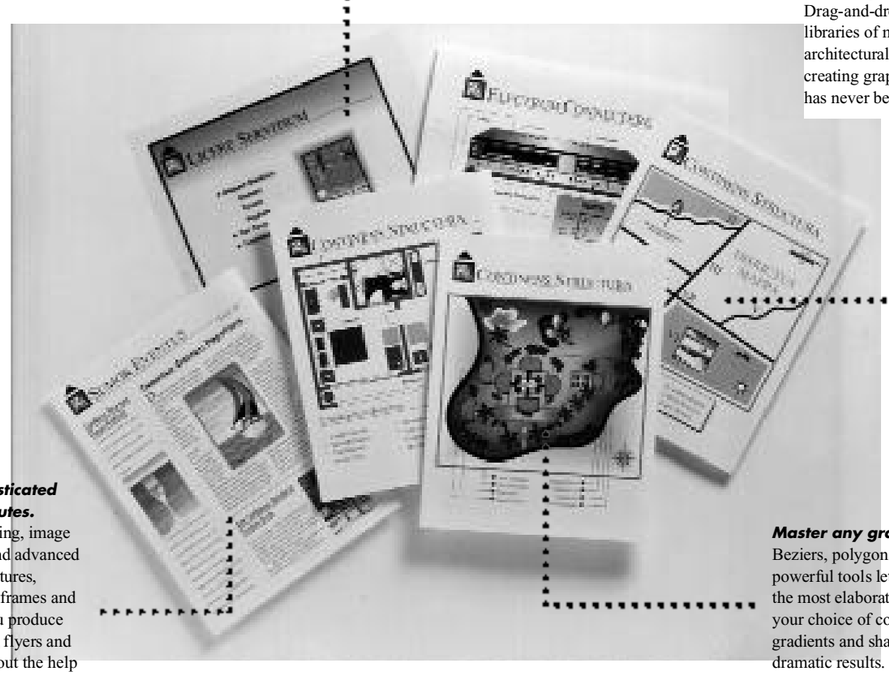
ClarisDraw
for Macintosh

Turn to the versatile new standard for fast, flexible and precise Macintosh graphics.
Breakthrough graphics intelligence and integrated drawing, painting and presentation tools save you time and effort creating professional-quality signs, maps, diagrams, free-form drawings, brochures, flyers and more.

Create powerful presentations in any format.
Communicate your work clearly with slides, handouts or overhead transparencies. QuickTime movies and special transition effects even let you create stunning on-screen slide shows that get your points across with impact.

Work smart and ensure accuracy.
Produce complex technical diagrams and space plans quickly and precisely with intelligent drawing tools like SmartAlign and PointGuide. Drag-and-drop SmartSymbol libraries of maps, elements and architectural art guarantee that creating graphics from scratch has never been easier.



Produce sophisticated layouts in minutes.
Full colour painting, image editing effects and advanced text handling features, including linked frames and text wrap, let you produce dazzling posters, flyers and brochures - without the help of a designer.

Master any graphics task.
Beziers, polygons and other powerful tools let you create even the most elaborate drawing. Add your choice of colours, fills, gradients and shadows for dramatic results.

Printer Support

- Apple LaserWriter, Personal LaserWriter, and ImageWriter families, and Apple StyleWriter
- Hewlett-Packard LaserJet, DeskWriter, and PaintWriter families
- A wide variety of other Macintosh-compatible, third-party printers

Graphics File Formats Supported

- EPSF
- TIFF
- PICT and PICT2
- CGM
- MacDraw II, MacDraw Pro
- MacPaint
- QuickTime Movie

Required Equipment

- Apple Macintosh Plus, Centris, Classic, LC, SE, Performa, PowerBook, II, Quadra or Power Macintosh family computer
- Hard disk drive and 2MB memory
- 4MB required for Apple System 7
- System software 6.0.7 or later, or System 7
- Apple System 7 required for Publish and Subscribe, Apple Balloon help and other System 7 features

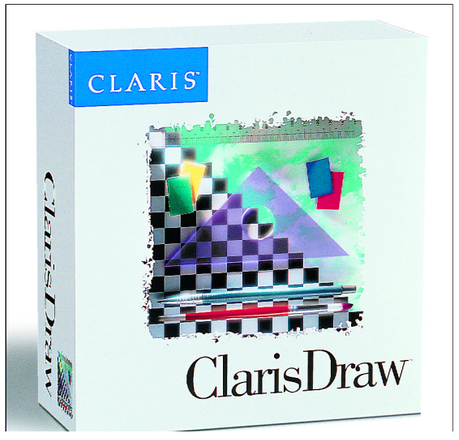
CLARIS

ClarisDraw
for Macintosh

Powerful New Features Include

- Comprehensive drawing tools, colours, fills, shadows and gradients to handle any drawing task
- Full colour painting and dazzling image editing effects to enhance drawings and scanned images
- Built-in presentation capability, including Apple QuickTime support and special transition effects, for eye-catching slide shows
- Advanced text handling to ensure professional layouts for flyers, posters and more
- Drag and drop SmartSymbol™ library feature to speed graphics creation
- PointGuide and Guideliner features guarantee pinpoint accuracy
- Shapes tool to quickly and easily create arrows, plus signs and other common objects of any size or direction
- SmartConnector™, SmartAlign™ and SmartSize™ features to automatically maintain relative object size, alignment and connections
- Industry-standard file format support that provides seamless graphics exchange with other applications
- Microsoft Windows version available in the future

Accelerated for Power Macintosh



Are you looking for a drawing program versatile and smart enough to speed you through all your different graphics tasks? Introducing ClarisDraw™ software — the innovative, new version of MacDraw™ that lets you quickly and easily produce everything from simple maps and diagrams to free-form drawings and complex space plans. Its unequalled breadth of drawing, painting and presentation tools make it easy to create virtually any graphic you can visualise. And thanks to its intuitive design and revolutionary graphics intelligence, you don't have to be a graphics expert to get the great looking results you want.

ClarisDraw makes it easy to master any graphic task, offering all the advanced drawing tools you need to create compelling, professional-quality graphics. But that's just the beginning. You also get a wealth of powerful painting and image editing tools, advanced text handling and presentation capabilities. And floating palettes give you one-click access to dramatic effects like shadows, embossing, colours, gradients and fill patterns.

Best of all, ClarisDraw has intelligent features that help you quickly produce sensational, accurate results. Its smart graphics tools eliminate the guesswork of traditional graphics programs — automatically maintaining alignment, size and connections between objects. The PointGuide™ and Guideliner™ features ensure precise results. And the drag-and-drop professional library puts thousands of high resolution pictures, maps and design elements at your fingertips.

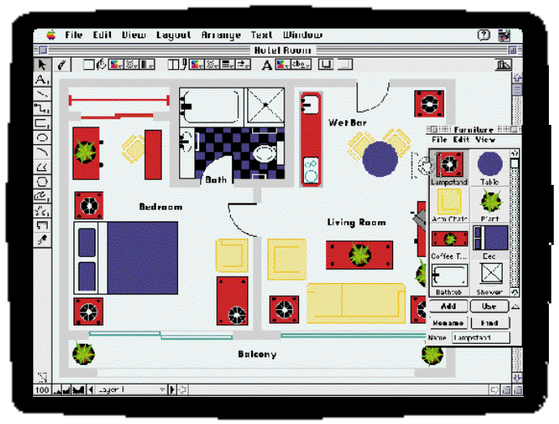
ClarisDraw also maximises your productivity by offering seamless graphics compatibility with industry standard file formats including MacDraw II, MacDraw Pro. And its underlying Claris Graphics Engine allows you to transparently share files with the new ClarisImpact™ software for the Macintosh and Windows.

ClarisDraw — the versatile new drawing standard for fast and flexible Apple Macintosh graphics.

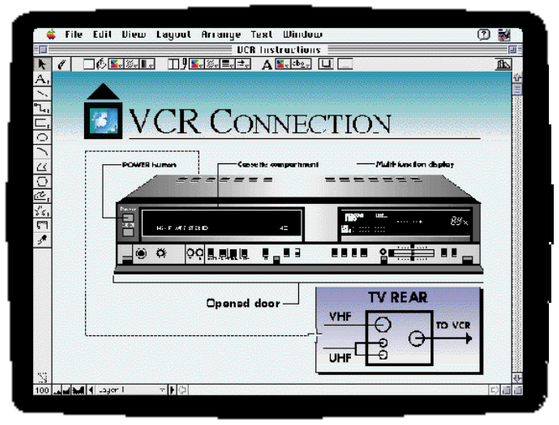
Claris. ***Simply powerful software.***™

The versatile new Macintosh drawing standard

ClarisDraw
for Macintosh



Let ClarisDraw virtually create your drawing for you with its library of high-resolution maps, figures, forms and architectural symbols. The "drag-and-drop" SmartSymbol library speeds your work, even automatically updating duplicated objects when you edit the original.



ClarisDraw has smart drawing tools, like SmartAlign and SmartConnectors that speed your work by maintaining relative object size, alignment and connections even as objects are resized and moved. PointGuide and Guideliner ensure pinpoint accuracy by automatically finding object centres and end-points exactly.

Features	Benefits
ClarisDraw Has The Versatility to Handle Any Task	
Comprehensive Drawing Tools	Create professional-looking graphics with tools for lines, rectangles, ovals, arcs, customisable regular polygons, beziers, notes and more.
Floating Palettes	Quickly access 64 customisable fill patterns, 64 gradient fills, 256 colours and your choice of line patterns and widths using palettes you can place anywhere on screen.
▸ SmartSymbol Library	Quickly produce compelling graphics with thousands of professionally-designed, high-resolution maps, figures, form elements and architectural art. Just drag-and-drop elements onto the page.
▸ Full Colour Painting	Produce dazzling 24-bit paint images with millions of colours using paintbrush, bucket, spray can and other tools.
▸ Image Editing Effects	Edit paint objects and scanned images for stunning graphic effects using tint, darkness, blend, distortion, shearing and perspective.
▸ Text to Curve and Object Binding	Achieve dramatic visual results with text curved or bound to any object you specify.
▸ Presentation Special Effects	Create and deliver eye-catching presentations using transition effects including fades, loops, automatic advance and background colours.
QuickTime Support	Give your presentations greater impact with QuickTime video and sound clips.
▸ Outlines	Add lists and bullet points to any drawing or presentation with built-in outlining.
▸ Linked Text Frames	Speed the layout of flyers and signs by automatically flowing text across frames placed anywhere on the page.
▸ Text Wrap	Wrap text automatically around any graphic shape to produce posters and brochures that get noticed.
▸ Text Styles	Save frequently-used text styles with font, size and other settings you specify.

▸ *New feature in ClarisDraw*

Features	Benefits
Smart Tools Take the Guesswork Out of Drawing	
▸ SmartSymbol Manager	Save time and effort using drag-and-drop objects from the included libraries or those you create. Cloned objects can be automatically updated when you change the original.
▸ Shapes Tool	Instantly place arrows, symbols and other eye-grabbing objects of any size or direction anywhere in your drawing.
▸ SmartSize	Automatically maintain the height and width of all specified objects, and instantly update all objects by resizing just one.
▸ SmartAlign	Automatically maintain alignment and spacing (top, bottom, centre, left or right) of graphic objects and text even as they are moved.
▸ SmartConnectors	Create straight or angled lines that stay permanently connected to objects, even when the objects are moved.
▸ SmartShadows	Add depth to any object by applying customisable shadowing effects.
▸ SmartEmbossing	Add a dazzling embossed effect to objects and text with a click of the mouse.
Precision Ensures the Highest Quality Results	
▸ PointGuide and Guideliner	Instantly locate mid-points, end-points and object centres to ensure precision placement of lines and objects.
▸ Direct Object Size Editing	View and edit object dimensions, length and angle of rotation for flawless drawing precision.
Precision at Any Scale	Ensure your drawings match high-resolution printed output exactly with precision zooming, object scaling and rotation, and accuracy of over 2300 dpi.
Flexible Document Configuration	Tackle even the most complex drawings with unlimited layers and document sizes as large as 254 x 254 cm.
Full Compatibility for Seamless Graphics Exchange	
Robust Graphics Import/Export	Exchange graphics with other users and programs via industry standard graphics file formats, including MacDraw II, MacDraw Pro, EPS, CGM, PICT and MacPaint.™
▸ Claris Graphics Engine	Maximise your graphics investment by sharing files directly with ClarisImpact.

Full colour painting with customisable paintbrush, paint bucket and spray can tools adds dazzling impact to your graphics. And powerful transformation effects, including tint, darkness, shearing and distortion deliver stunning results with scanned images and photographs.

Create and deliver elegant, high-impact slide shows tapping special effects like fades, loops, master backgrounds, even Apple QuickTime movies.
