Schedule Publisher ©

Installing your demo copy of Schedule Publisher onto a PC.

From Windows © Program Manager, select File/Run

In the command line field type > D:\AMS_SP\INSTALL <enter>

Follow the installation instructions as they appear on screen.

At the 'select drive' prompt you must select a local hard disk i.e.. C:\.

Double click on the Schedule Publisher Icon to run Schedule Publisher.

This version of Schedule Publisher is a demonstration version only. It has been restricted to 29 activities and the printing option marks any printed output with a banner indicating a demo copy. If you would like further information about this system please contact:

Advanced Management Solutions Ltd.

UK 44 (0)1491 411966

Continue...

General Information

Schedule Publisher is available on most common platforms including PC Windows, Macintosh and UNIX.

There are also network versions available for each of the above environments.

Schedule Publisher was first released in 1989 by Advanced Management Solutions. There are now over 25,000 copies being used world-wide.

Minimum hardware:- 386/DXnn, 8Mb RAM, 10Mb free hard disk space. 486/DX66, 8Mb or higher recommended.

Maximum no of activities per project:- PC 16,000 - Macintosh 10,000 - UNIX 25,000

About this tutorial

This tutorial is designed to get you started with the **Schedule Publisher** project management application. Due to the extent of Schedule Publisher's vast functionality, it is only possible to cover some of its most basic features in this tutorial.

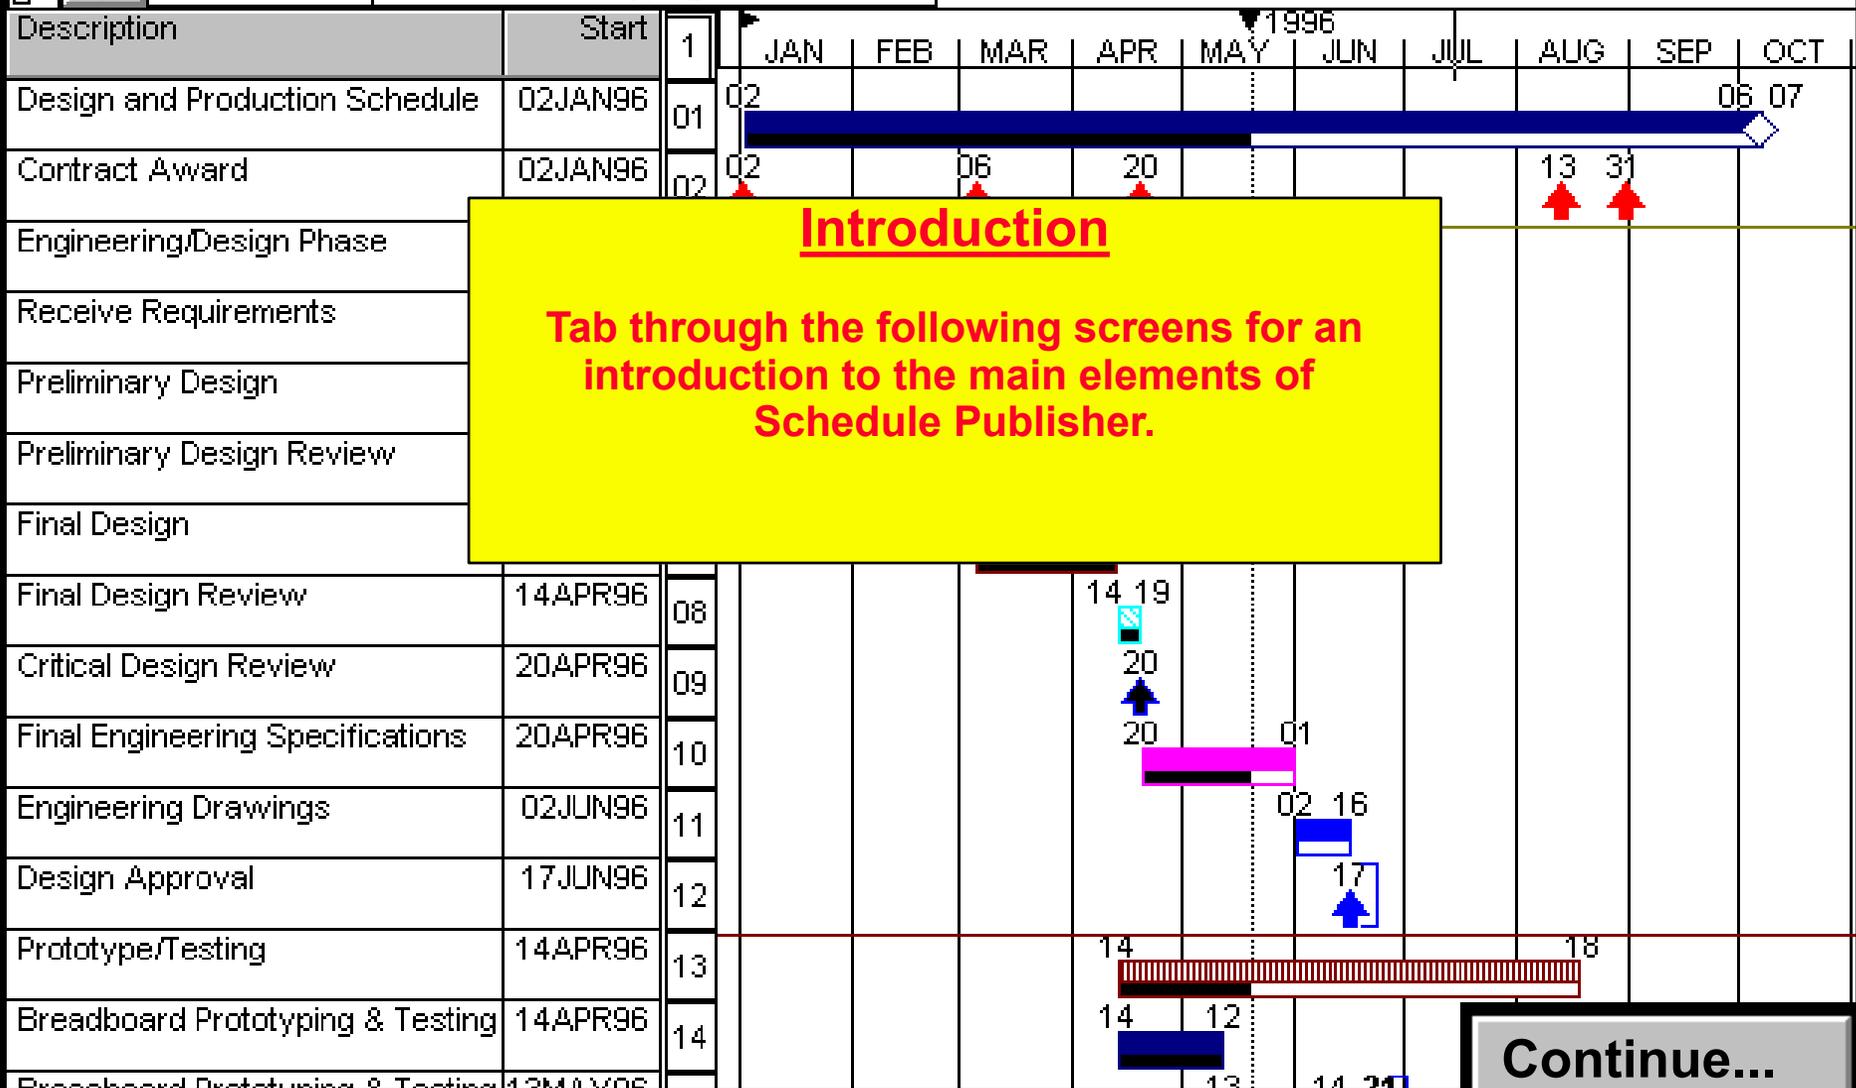

Simply click on the left hand mouse button (or Spacebar on the keyboard) to move forward through the different topics. Clicking on the right hand mouse button (or Back Space on the keyboard) will take you back to the previous slide.
