Ok This tthe Xfiles screen saver. The one and only. the artwork is orginal artwork from myself and from TREKKERS. Beta testing by ERINAF and TREKKERS.

To install the program simply copy XFSS.SCR into your windows directory. In win 3.x us the controll panel then desktop to test and setup the screen saver. For Win95 right click on the desktop and hit Properties. The rest is simple.

I of coarse take no responsibility of any kind for this program. It has of coarse been tested but there is Always a posibility for error. **USE AT YOUR OWN RISK!** And while I've done my best to get it to work, **I OFFER NO WARENTY OF ANY KIND!**

You can contact me at TrekerL@AOL.COM or Jlundell@Tiac.net
