Introduction

DiskCopy is a simple little 32-Bit program for formatting and creating duplicate disks. Unlike Explorer and File Manager, which need to read the source disk for each duplicate disk you wish to create, **DiskCopy** will prompt you for the number of copies you have in mind, making for a much quicker operation. **DiskCopy** does not do a track by track copy - it simply copies the directory structure, files, and the volume label of the disk, but 99% of the time, that is exactly what is needed.

Format Options

Quick Format
Full Format
Capacity
Volume Label
Copy System Files
Full Boot Disk

The Quick Format removes all the files from the disk. You should only use Quick Format on disks that have previously been formatted, and that you are certain contain no errors.

Prepares a disk so that you can store information on it. Any files on the disk will be removed.

Select the proper disk size and capacity here. The default is ''1.44M'', but you may choose from the other options in the list.

If you wish to label the disk, you must first check the Volume Label option, then type in the desired label. The volume label is limited to a length of 11 characters.

Selecting this option will copy the critical system files on to the diskette, enabling the disk as a startup disk in case of a hard drive failure.

This is similar to the **Copy System Files** option, but, in addition to copying the critical system files, also copies several files which might allow you to correct whatever problem caused you to use the boot disk in the first place. It is very important that you have a boot disk on hand in case of emergency. If you do not have one, use this function to create one as soon as possible.

Registration

This program is shareware, and, as such, may be used freely for a period of 30 days. If, after the 30 day evaluation period expires, you find this nifty little utility useful, and plan to continue using it, you are required to register the program.

By supporting the shareware concept you are helping to ensure its continuation, which, I think youll agree, will benefit us all

If you wish to register the program, we do accept **VISA** and **MASTER CARD**. Our toll-free registration number is **1-800-617-7740**. The cost of registration is **$10.00**. If you would like a copy of the program on diskette, there is an additional **$2.00** shipping and handling charge.

If you prefer mail, please send a check in the amount of **$10.00** to the above address. Be sure to include your name, address, e-mail address, and the exact name of the program, so that we can immediately send you the registration information. If you would like a copy of the program on diskette, there is an additional **$2.00** shipping and handling charge.

If you are a CompuServe subscriber, the program can be registered in the Shareware Registration forum. The SWREG# is 8304.

Upon receiving the check, we will e-mail you the registration code immediately. If you have any questions or comments, please don't hesitate to drop us a line. To reach **CT Software** by e-mail:

If your have more than one removable drive, choose the source and destination drives here, simply by clicking on your choice.

This is where you choose whether to **Copy** or **Format** your disk. The command button at the bottom of the program will reflect your choice.

On-Line Support

On-line support can be accessed through the **CT Software Forum on America Online** **(keyword: CT Software).** All of our programs and required support files can be easily found there, as well as the CT Software Message Board. In addition, valuable tips and information are posted regularly in our **Tip Of The Day** feature!

Please feel free to visit our World Wide Web site, from which you can download all of our software, and access complete product descriptions of the very latest versions of the shareware offered by CT Software, in addition to offering links to many other excellent shareware sources. The **CT Software Home Page URL** is:

"http://members.aol.com/ron2222"

Other Programs by CT Software

CT Calendar

CT Calendar is a small 32-Bit desktop calendar. We have tried to keep it small enough to keep on your desktop, but not so small that you need a magnifying glass to see it. It has many customizable features including color and loading position.This program is free of charge with the registration of any CT Software 32-bit shareware program.

CT HotSpot

CT HotSpot is a small utility with which you can create 2 hotspots - 1 to turn your screensaver on, and the other to turn it off. This can be quite useful when downloading a large file, doing a tape backup, or when using the Windows 95 utility, *DEFRAG*. Having a screensaver come on during any of these activities can wreck havoc with your computer and your files.

FormPost Edit

FormPost Edit is a special text editor for those of us who have to contend with posted Web forms. In addition to the many standard editing capabilities that the program has, its specialty is interpreting the extraneous characters contained in posted Web forms, turning them into easily readable text. Of course **FormPost Edit** can then either save or rename the form, as you wish, and also send it to your printer. In addition: 1.) **FormPost Edit** offers full font and color control, and will save your settings. 2.) FormPost Edit features a toolbar, complete with help balloons, which can be toggled on and off, as you wish. 3.) **FormPost Edit** will allow you to both print and save to a file selected text only, if desired. Simply select the text with the cursor before invoking the print or save as command, and only the selected text will be considered.

Notebook for Windows 95

There is one, and only one point to this program - to replace Notepad. **Notebook** is not a word processor. It's sole purpose is to view and edit text files. **Notebook** does have 6 major features (and several minor ones) which we believe make up for Notepad's inadequacies:

1. It will open **very large files**, and allow you to edit them.

2. It features full font control - you can set the font name, style, size, and color, and your settings will be saved when you exit the program. It will look better on your screen, and do a much better job of printing.

3. **Notebook** has a toolbar complete with help balloons.

4. **Notebook** features *DRAG AND DROP* text editing. If you want to move a block of text, just use the mouse to select it, and drag it to where you want it.

5. **Notebook** supports overtype mode. While the default editing mode is insert, hitting the INSERT key on your keyboard will change that to overtype.

6. **Notebook** can both print and/or save to a file **selected text only**, if desired.

Safety Net Pro

Safety Net Pro is a highly acclaimed utility for backing up key files by file extension. It has one default setting - to backup key "windows" and system files including INI files, Registry Files, CONFIG.SYS, and AUTOEXEC.BAT- and 5 user configurable options. **Safety Net Pro** could easily backup all of the document and/or database files on your drive, for example, with the directory structure **intact**, and it can Zip them to disk. **Safety Net Pro** has several advanced features that **Safety Net** lacks, including built-in 32-bit zip compression (PKZ v2.04 compatible) and the ability to span Zip files across multiple disks **Safety Net Pro** can also print file lists, print your directory tree, and make a boot disk.

Winsock Swapper

The purpose of **Winsock Swapper** is to automate the process of swapping various WINSOCK.DLL files for those of you who use more than one Internet service provider with your default Web Browser. With one quick double-click, you can swap up to three DLL's, and optionally launch your browser. It doesn't get any easier than that!

YahtC

This game is a clone of the immensely popular game, Yahtzee. **YahtC** combines attractive 3D graphics with extreme ease of use. There are no complicated instructions, and no hidden forms. Each player's score is always visible. A sound card, while certainly not necessary, will greatly enhance the game, which produces sound effects when a player rolls the dice, "zeroes" out a scoring category, or rolls a "YahtC". The game will also keep a permanent record of High Scores, which can be easily cleared at any time. **YahtC** is fully functional, and supports up to 4 players.

ZipWorks

ZipWorks is a full featured 32 bit ZIP file manipulater for Windows 95. The built-in 32 bit compression is fully compatible with PKZIP v2.04. With this program you can ZIP, UnZip, add comments to your ZIP files, test archive integrity, and repair damaged ZIP files. This program can create files across multiple disks, and can store directory structure, making it a pretty fair choice for a backup utility, though its "cousin", Safety Net Pro, might be a little better suited for that purpose. There is an option in the Preferences dialog to associate ZipWorks with the file extension "ZIP". We highly recommend that you take advantage of this very useful feature, which will add 3 right-click menu items to your appropriate zip files in Explorer - open, UnZip, and UnZip To Path. The primary help engine for this program revolves around the context-sensitive help concept that Windows 95 makes such liberal use of.
