## **Welcome**

Dear Preview Program Participant,

Thank you for participating in the Micrografx® Picture Publisher® for Windows 95 Preview program. We at Micrografx are pleased to offer a preview of the newest version of the award-winning Picture Publisher.

To help get you started, we have placed an 'Introduction' tutorial on the CD. The tutorial will explain some of the new features of Micrografx Picture Publisher for Windows 95 and other Micrografx products. See the instructions below on how to run the Introduction tutorial. We hope you enjoy the Micrografx Picture Publisher for Windows 95 preview.

Sincerely,

Craig Simmons  
Product Manager Picture Publisher

## **How to Run Picture Publisher**

From Windows 95

1. From the Start button. Select Programs.
2. Select the Picture Publisher Icon.

### **Notes:**

If you are running Windows NT, Select the Icon from the Program Group.

Installation of the Preview can only work on local machines. Network installations will not work.

## **How to Run the "Introducing Picture Publisher" Tutorial**

From Windows 95

1. From the Start button. Select Programs.
2. Select the Micrografx Folder (If this Folder was selected during the installation)
3. Select "Introducing Picture Publisher".

Note : If you are running Windows NT, Select the Icon from the Program Group.  
You can now learn about Micrografx Picture Publisher for Windows 95.

## **Deinstalling Picture Publisher**

From Windows 95

1. From the Start button. Select Settings.
2. Select the Control Panel.
3. Select Add or Remove Programs.
4. Remove Picture Publisher 95.
5. To assure all files are removed, remove the Picture Publisher folder under the Micrografx Folder. (This is the default installation path x:\Program Files\Micrografx\Picture Publisher 95)

Note : If you are running Windows NT, Select the Uninstall icon from the Program Group. Follow the above step #5 to insure deinstallation.

## **System Requirements**

CPU : 386 33 MHz (486 33 MHz or higher recommended)

Memory : 4 MB (8 MB or more recommended)

Drive Space : Up to 17MB.

Video : SVGA (256 colors or higher)

Operating System : Windows 95 or Windows NT (version 3.5.1)

Input Device : Mouse or other pointing device

## **Features not yet implemented**

JPEG

AVI

TWAIN (No Scanning support)

Pressure Sensitive Tablets (Wacom, Calcomp, Kurta, Summa, etc...)

32-bit Kodak® PRECISION Color Management System

There is no On-Line help at this time.

No plugin support.

## **Known Problems**

Image regeneration using the Command List or Macros may or may not succeed. If you have a set of steps that makes the regeneration fail, please send in a Problem Report to Micrografx. See below for more details.

Only support Corel 3.0 .CDR files.

Opening multiple vector file types will cause a fault. Open one type at a time.

OLE is not correctly functioning under Windows NT.

Picture Publisher\Windows 95 will not currently read non-attributed file names from some networks.

Installation of the Preview can only work on local machines. Network installations will not work.

Delete any .tbp files in the program directory from previous versions installed on the system.

## **Comments and Suggestions**

There will be no technical support available for this Preview application. Your comments and suggestions are important to us however. There are a number of different ways that you can send Micrografx your Comments and Suggestions.

In addition, there are many great tips and tricks you will find with the program. Please let us know about them and we may even select your tip to be used in our online help.

If you experience a problem with Picture Publisher, and you wish to report it, please fill out the PROBRPRT.WRI file found under the Micrografx Folder and either fax it or E-Mail it to Micrografx.

We appreciate any comments or suggestions you may have about the product.
