

Primary Learning

08-19-97

KIDware

Primary Learning is an all-inclusive educational package for children age 6 through 14. It offers 10 programs, covering spelling, math, and U.S. geography and presidents. Kids can play a nonviolent hangman-style game called Balloon Race, which uses 1,400 words (or you can easily add your own). Simply click on the radio button to set the grade level from Kindergarten to Grade 6. Space Race is a game in which up to four players unscramble words. Two games concentrate on multiplication, division, addition, and subtraction, and there are two games that work specifically with fractions. All of these games offer a review option and the ability to set playing levels. The Lemonade Stand gives kids a feel for the business world as they decide how much sugar, lemons, and cups they should buy based on the weather forecast. The U.S. geography section quizzes kids on states and capitals. Kids can also learn about and then be tested on the U.S. presidents. Primary Learning offers so many features for such a wide age range that your kids will be using it for years. This version is a minor update.
